

2016 Bucks for Sale

July 27, 2017

In WordPerfect under: 2016 Bucks for Sale

This list has been picked over by dozens of dairy farmers for over a year

We recommend you try the
2017 Bucks for Sale list
instead.

Also, **ADVANCE BABY SALES**
(this list has been picked over by dozens of dairymen already.)

If you want one, send a deposit of 10% (or a \$100 minimum)
and a contract2

*Contract2 is behind the button, "Order Forms", on the website. Or call us (301) 834-8030 and we will fill it out!

THANKS!!

Buck - August 2014
DS: CAPRIKORN ZECRET BLUE STAR *B page 26 recent bucks LA-
90, Jermain BLUE STAR'S numbers are good enough to be
number one on sire summary. But he does not have a dau
with a lactation in another herd.
SD: SG CAPRIKORN SNOW AQUAGIRL 4*M #60 97%ile Elite Doe
Beat all the yearlings, beat all the 2 y.o.'s,
bought for \$2,230
D: CAPRIKORN BLUE STAR FLEET #558 AS1714802
Highest PTAM of any Saanen in U.S. Aug. 2016
A very good looking yearling whose first test, 11.5 lb, was
tied for highest among yearlings.
DDS: SGCH RENOVATOR AI ++*B **LA-92** formerly #1 on Sire
Summary! Now "inactive".
DD: SG CAPRIKORN RENOV'S ZTARTREK #991 -(our best
doe)National's Placing 305 4000+
DDD: SG CAPRIKORN KRUG'S STARGATE 1*M #1 in U.S. Twice
LA-90 & LA-89

Alice listed ZTAR FLEET as HAN SHOT FIRST's dam and ADGA has
finally fixed that error. This is a very handsome buck but he has
two horn stubs about 1 and ½ inches. He is built best of all but
has a 2 3/4" sharp horn stub. The judges still put him 1st of 4
in their different rings.

Handsome but with 2 2" stubs.

One of only two Saanens in the history of the U.S. that
had two lactations over 5,000 pounds in 305 days or
less. Every 10 or 15 years nature sends us a genetic
freak. Best Udder versus 24 milkers at District 3

Saanen Specialty.

D: CAPRIKORN CZARGATE FLORENCE #577 **99th percentile** 4th PL MI
DIED SUDDENLY SEPT 5, 2016.

a very good looking first freshener even better looking than STAR FLEET. FLORENCE was leading all the yearlings in milk. The double whammy - FLORENCE was our yearling milker entry at the Nationals July 4th, 2016. And she had tight shoulders. **V per the appraiser.** Viewing the herd as whole on the average our number one conformational weakness is shoulders.

DDS: SG YELSON +*B p. 15 Recent Bucks. Previously we thought he was our milkiest buck before his son STARBY took over

DD: SG CAPRIKORN YELSON CHEYENNE 5*M #2143 AS1614179 97%ile
Young Stock Ec

LA-90 Second place Dam and Dau Nationals July 4, 2016

01-06 305 2716 81 3.0% 77 2.8%

2-06 306 3617 122 3.4% 103 2.9%

We said "Will probably be 1st place Jr. Yearling at 2013 Nationals." two years ago in this catalogue. WAS ACTUALLY 2ND PLACE ON JULY 9, 2013!

And on July 4, 2016 she was 12th place 3 year old.

If you saw CHEYENNE you would know right away you want her kids. Her dam was ranked 99th percentile and her sire is our best milk buck out of those with a positive PTAFS. It was scary to think how good CHEYENNE could be. As a kid she has been shown only once and was Grand Champion. In milk, before she turned two, she was first in both rings as a milking yearling. Then we stopped showing her. It's too bad U.S. breeders put way too much weight on mammaries and way too little weight on milk/fat/protein. But that IS the way it IS. Feb. 19, 2014 maybe an E mammary - maybe not enough fore.

Fabulous rear and teats. Shown only once in 2015 and of course she could not beat CASSIOPEIA. CHEYENNE got coded "A" for acceptable for feet. Bad. smh codes J 88, Ec WS, 90 KS

DDD: SG CAPRIKORN RENOV'S WINNEMUCCA 4*M

02-09 305 3729 153 4.1% 119 3.2%

LA-90 VEEE

We took FLORENCE to a show the Saturday before Memorial Day 2016 and she beat four of our other yearlings in all three rings.

We took HONDURAS to a different show on June 5 and he was 4th of 4 in one ring and 2nd of 5 in the other. As of Sept. 2016 we are using HONDURAS on some of our "milk and Show" NSBA type does.

Awesome BC beyond excellent. Right rear heel is shallow. Very friendly, Excellent escutcheon. VG rump angle.

Herman Melville wrote Moby Dick.

The problem in selling HERMAN is we have been breeding for
Milk/FAT/PROTEIN.

But dairy farmer would like to see 4,000 in 305.

The average buyer isn't wise enough to see that 3724 with 3.6%
and 3.2% pays way more than 4,000 with 2.8% and 2.7%.

Keith Tiff's daughter came with a completed signed check on June
13 but we convinced Keith that HERMAN was too wimpy.

Aug.13, 2016, Scott said: "From a glance he is the best looking of the 20 bucklings in that pen. But still the shoulders are a little loose and the hips are a little higher than the withers."

HERMAN M excellent looking buck, excellent thick pasterns, tight toes

D: SG CAPRIKORN STARBY DONUT 3*M #343 AS1628756

Born January 25, 2012

American Saanen **2 y o** LA 87 VVEV Way too low.

Was One of the 4 showiest yearlings that traded places. First in
both rings in her first show. Later defeated.

BUT ALSO ONE OF THE TWO **MILKIEST** YEARLINGS!

0-11 315 3065 112 3.7% 91 2.9% Fabulous

DDS: CAPRIKORN KAHUNA WEALTH MAKER *B

DD: SGCH CAPRIKORN WEALTH XTORT 2*M #756

As of November 2014 she was first in lifetime milk, fat and
protein. In July 2015 her lifetime fat was 900. The closest
doe to her had only 700! Milk 29,208 lb. As of Dec 2015.

Some cows don't get that far.

DDD: CAPRIKORN SNOW'S VANILLA 1*M

It's not as good as it sounds. Her full sister DOUGHNUT was
uneven. Her other full sister DILL was slightly uneven - but

could make EX as 2 y.o. if evens out.

DILL steep rump, awesome arc, teats pointing out a little, roly

poly shoulders, fore has extension, but is chopped. Donut HAS A VERY strong and loud heat making her a great A/I candidate.

We bred DONUT A/I to TZAR on May 6, 2015. It didn't work, of course. We would use HOME BREW with our next herd Sire if his dad was ECLIPSE. But HOME BREW is too inbred.

We picked him out of all our baby bucks to show untrimmed and he finished in the middle of the classes. So, he looks very good.

WINNER OF LIFETIME MILK AWARD over all Saanens July
2013 & again July '14 AND 3.5% lifetime fat
3.06 305 3894 131 3.4% 109 2.8%
lifetime 2,072 days 22,781 lb milk 3.4% fat

FLASH was the highest milking yearling on the yearlings first
test.

And the highest projection after the second test.

Dam is a show star, but not the very top of our milk. The Sire,
however, should kick the milk up through the roof. So HOT ROCKS
is worth the investment if you want a lot of help with your
udders and feet in ADDITION to big milk checks. But if you only
need milk/fat/protein, skip on to a cheaper guy.

We said "FLASH is going in the ring at the Nationals July 4th and
if she smokes them, HOT ROCKS price will go up." She didn't kill
them but she did really well. So we took the price from \$1,995 to
\$2,795.

UPDATE -On August 7th the cdcB ratings came out and FLASH got a
96th %ile and CZARGATE got a rating high enough to make him #1.
After mastitis the ctr knocked her down to 89 from 96. Except he
only has daughters in one herd. So we took HOT ROCKS from
\$2,795 to \$5,995 because he suddenly is the buck of the year and
we want to use him in our breeding program.

On September 23, 2016 failed to collect semen while A/I guy was
here.

Scott is giving him Ec. The appraiser gave him a +EcV+.
Scott says excellent topline, Excellent width front and back.
Looks great on the move. Excellent head and rear leg angulation.
Not friendly enough Vg+ especially. Shoulders are good not great.
VG and BC clean front legs. Back heels are a little shallow.

CAPRIKORN ZURICH HORSERADISH #681 PE1767149

EXPERIMENTAL!

Not an american Saanen

Born February 18 2016

Perfect for Dairy Farmer!!

DD: CAPRIKORN SNAP ECLAIR #4114 **99th** %ile and built like a tank AND MILKING POWERFULLY

98 DAYS 1,381 POUNDS AS OF June 2016. May test 18.5 lb.

We entered her in the vsdga show. But when we loaded up Alice ans Scott spaced out and didn't bring her.

DDD: CUMIN - Possibly our best milker. Time will tell.

TOP TEN once already and probably going to be **TOP TEN** again when list come out in August 2016.

Very unusual to get 4,700 in 305. Mabey 5 living Saanens have done it

Why perfect?

Because HORSERADISH is cheap because Saanen breeders don't want him! His dam, FASNACHT, knocked down 10.5 as a baby and is headed for 2500! With very good components.

Why perfect?

Because his sire is the #1 Saanen Buck in the USA for milk/fat/protein.

Why cheap?

Because HORSERADISH is something called an "Experimental", not an American. Dairy Farmers don't care!

Why cheap?

Because his dam, FASNACHT, has a big dip in her top line. Dairy Farmers don't care! We here do have to care. Because sometimes we sell to people who waste their time walking in circles in show rings hoping that the judge will say their Saanen is the prettiest.

CAPRIKORN FIRST TIME BOSS HARLOW #683 Born February 22, 2016
American Saanen Never Appraised

Reserved by Henry Raber \$1,645

SS: SG YELSON + *B- probably our milkiest buck before his son STARBY came along. YELSON's dam -305 4990, previously the highest PTAM of any Saanen

S: SG *B CAPRIKORN YELSON MEADOW BOSS

MEADOW BOSS has the numbers to be on the Elite Buck List. But the computer won't list him there until there is a tested dau in a SECOND herd.

We took BOSS to his first show on June 8th of 2014. He was 3rd of 3 in Rings 1 & 2. He was second of three in Rings 3 & 4. In Ring 4, the buck that beat him went on to be the Grand Champion.

He is longer and taller than other Saanen bucks with very sharp withers. He looks awesome from the side and he is too narrow viewed from the rear. In 2012 Ben placed him first over the other "B" bucks in spite of the narrow rear end.

His sister also has a 92 just like his dam.

SD: SGCH CAPRIKORN RENOV MEADOW VIOLET 10*M - 95th %ile
01-02 299 3620 91 2.6% NSBA GOLD SEAL - LA-88 VEVV 2yo

6 y.o.

05-01 305 3327 99 3.0% 93 2.8% NSBA SILVER SEAL

Finished in only 4 shows, a total of 6 rings.

An ELITE DOE (which strictly measures milk/fat/protein genes). VIOLET had "INVERSION" - more protein than fat. We chose VIOLET's twin VERN to breed the awesome does STARGATE and VENICE. Nine pounds at birth. We named the dam to honor Tina Gilchrist's immortal GCH FOOTHILL FARM MEADOW SPRING TOP TEN LA 90. Dam had the big arc 35. And Rear Udder height: 38. Dam had extra teat. VIOLET started life with the RENOV steep rump. That changed. We don't want to waste time on conformation but one item we do want is "The Big Arc"! We used to have big wide escutcheons. When CRUZERIO did 5100, totally smashing our previous record, everything became lined on her. Then we lost the Big Arc. SPRING's descendants will bring it back. As of November 2012, Violets lifetime was 1,396 days 15,575 milk. She had cream, not white hair and an undesirable Saanen nose. It's so easy to be the top Saanen milk herd. The other breeders select for color and noses. We can just keep selecting for milk/fat/protein, all wrapped into one number called "percentile," or "Rank". She "HAD IT ALL". VIOLET'S dau MEADOW ZEPHYR also has a **92**.

Smh 88 Code W Smh91 Code J Smh 92 code J

DS: *B CAPRIKORN RENOV VANDERBILT (Moose page 20)

Former Sire Summary Buck. MOOSE WAS HUGE AND ALL HIS BABIES ARE TOO. He made BIG ears and BIG milk. He can throw color.

A hyperactive giant, MOOSE had milk written all over him.

At one year and 2 months he was bigger than all the mature bucks here. In June OF '07 the Appraiser got 40 7/8" at the withers.

D: CAPRIKORN RV'S ZUNI #908 The top milker at First Time September 2014! It looks like ZUNI could be #1.

As of October 2015 ZUNI is #2 on the TOP TEN this year!

LA-77 LA-81

FASTNACHT is butt ugly as a first freshener. Some dairyman will
get an awesome deal because of her nose. Yes, her nose! It is
conVEX and Saanens must be conCAVE. Also her first test was
pathetic. We know the awesome milk genes are there. But try to
explain that to buyers. The buyers only question is "How much did
the Dam milk". Robert fisher figured it out and on May 21 chose
HOMINY.

When Ron came by to pick up the doe Ann Estep had bought, that
doe was sick. We don't sell sick or injured goats. So we

substituted CINCERITY even though she was priced \$395 higher.

Continued...

A LOT OF THINGS HAPPEN WHEN YOU BUY A SAANEN. IT HELPS TO KNOW WHO YOU ARE DEALING WITH FROM THE START OF YOUR SHOPPING EXPERIENCE.

CENCERITY'S mammary was disappointingly small as a baby. But her dam did the same thing and came back and went perm and Top Five. And her dam ended with a mammary too BIG.

CENCERITY #258 teats are right, angling very slightly in. This is what we want to key on because most Saanens teats are aiming slightly out. BUYER'S TIP: Angling out is not good. Maybe your doe won't get mastitis. But maybe she will. You have ENOUGH problems as a Dairy Farmer without another mastitis case. PRE-DIP + POST-DIP. However the teats are too narrow. But they are long enough for our handmilking customers.

As a 2.y.o. she was looking very good. ADGA failed to appraise us. We'll see at 3.

#258 is looking good. Mammary is either VG or EX

HONESTY excellent looking buck, excellent thick pasterns, tight toes

09-09 220 1950 53 2.7% 54 2.8% IN PROGRESS
Still milking at 10 years old SEPTEMBER 2016!!
Lifetime 2,497 days 27,299 lb and climbing. WOW!

Not only did she start early, 9 months of age, but very few does can do 2,900 ending at 8 ½ years old.

Her dau ANDROMEDA was 10th? yrlng milker at National Show
What if we could develop a strain that always kidded at under one year?

WIARA, FORMERLY 97 Percentile rank, has fallen to 90th.

The USDA computer needs to learn how to give older does a break.
Her doe Yiara owned by Scarlett Payne.

Our other Top Ten that year was WIARA's niece YIN YANG #821.

WIARA bred herself and kidded at 9 months of age! AND had a 16 lb test! WIARA is super friendly. WIARA had a PTA for stature of plus 9.9, which was bigger than any buck in adgagenetics. At 1 yr & 6 months, bigger than the mature does. (MOOSE was a giant). So in Fall 2013 we were using BING, because he was born when his dam was 8 ½ months old. BING was bought, but he begat NEW ERA #424, before he left. So now we have the start of a new breed of Saanens that kid at a younger age so the dairy farmer doesnt keep losing money on them while they are dry.

Our oldest doe as of February 2016 and TESTED PREGNANT! We use her son, NEW ERA, #424. And HERACLES will probably be our clen up buck this winter.

DD: SG CAPRIKORN KRUG'S **STARGATE** - page 59 - #1 in U.S.A TWO
DIFFRENT YEARS! (All breeds)

LA-90 & LA-89 & BUIS vs. 24 milkers.

Now the question is - Since we use a WIARA son here, why hasn't anyone bought HERACLES? Because they think they know better than the heaviest milking herd in the U.S.? Or because they don't realize that if their herd was averaging 11.7 like WIARA's, their milk checks would go up by \$51,030 per year.

11.7 pounds here minus 9 pounds there equals 2.7 lb per day times 150 does times 300 days times \$42/ hundredweight equals \$51,030 more per year.

HERACLES does have a weakness - his dam's b.f.%. ECLIPSE should bring that up, but not enough for it to be positive.

HERACLES has one rear foot that Scott calls a "rocker foot."

HERACLES - "One of American Dairy Goat Associations Sire Development Bucks"

#424 - WIARA's babies are friendly, have personality, and come up to you when you go into their pen.

HERACLES Big and Rangy, Excellent length. Shallow heels, good rear leg angulation. Clean front legs. Good to very good escutcheon.

Good shoulders, Excellent DC. Probably go 91 at 5 years old. Extraordinarily friendly, inquisitive, and human like. We used him as the clean up buck on the main milking herd.

DDDS: CAPRIKORN CHAIN'S HARD CASH +*B

DDD: GCH SINCERITY 4*M p. 41 formerly top lifetime milk
in our herd

Big, powerful doe. But not a great milker.

COUNSEL is a 58th %ile tell us she is slightly above the average
of all the Saanens on test. Which means she is

WELL above the average doe in an average commercial herd. Not
good enough to sell a buck kid to a big commercial dairy.

Terrific mammary. Teats pointing in. Yea!

So, why is an average doe still here? Because she had a big
hematoma (swelling) as a kid. The vet thought it might be cancer
and we put that in the sales list. We can't sell a doe that might
be defective, so here she stays.

YOUR HONOR computes to 79 %ile

More milk, fat, protein than 4 out of 5 tested Saanen bucks.

Has style, dip in top line, pasterns?

Lifetime Fat Award, 2016 ADGA National Show.
DD: SG DAUGHTER'S X ILEX 9*M TOP TEN TWICE - page 8

CALEX2 has one of the highest butterfat % we ever had.
One of the "late shift" kids - she was born April 29, CALEX2
stood out in the looks department.
She had a short baby lactation because she kidded May 18.
In June 2016 CALEX2 started walking on three legs. We thought she
broke her leg. The vet said infection. We started with heavy
antibiotics. Scott wants her back in the milking string. Alice
says there is no withdrawal time on these antibiotics and she is
going to give her even more. So as of July 2016 CALEX2 is out of
the Milking string and dry. So her 2016 Lactation will look really
bad. That MAKES HER NEXT KIDS A GREAT BARGAIN FOR THE DAIRY
FARMER.

HALEX is good looking. 2nd best built kid in his pen of 10. A
little loose, which may be good. Very nice escutcheon. Longest
kid in pen. Needs to walk more uphill. Good looking. On 6/15/16,
Scott said he is huge for his age.

HALEX - "One of American Dairy Goat Associations Sire Development
Bucks"

HALEX2 - "One of American Dairy Goat Associations Sire
Development Bucks"

Up to here all the bucks were born before March 11.

From here on back the bucks were born
after March 11.

Last year when we began breeding as
early as possible, the first buck that
would work, young or old, was #5144 FRA
DIABLO. He was born March 11, 2015.

Therefore, the bucks from here on back
are not likely to be the first to work
this year.

FRA DIABLO'S first kid was born January 19. So
he was breeding at 5 months and 8 days of age.

Yea CUMIN!

But we have always used a rule of thumb of 6 and ½ months.
They're all different.

(Most of our Dairymen customers do not want to buy a buck that
they have to carry over to next breeding season no matter how
good that buck kid is.)

Tip to our dairy farmers. They tell you that CIDR's will make
your does cycle early. They forget to tell you that doesn't work
because your bucks wont work in July.

Starting off 4 y o lactation with 18.5 and 19.0 **wow**
Having bang up lactation in 2016 - should end the 305 at around
4,000.
WIDEST udder in the herd. VERY IMPORTANT. You can't make them too
low. You can't make them stick out in the back or they pee on
them. Not much milk going forward. So make them wide!

On 6/15/16, Scott said HIGH BAIL looks great but has loose
shoulders. On 7/25/16 four Amish Dairymen were here and HIGH BAIL

was in consideration. But he was not one of the three they picked. What Scott saw was "A lot of dairy character, very good escutcheon, goodloooking, maybe a little top line weakness if you are looking for it." There may be other BAR EXAM buck kids some day. But none sired by ECLIPSE, who died.

HIGH COURT is more stylish on the move. It is hard to say how much top line dip he has with all the hair along his top line. But we are milk breeders so we prefer the slight advantage in width both from the back and from the rear that HIGH BAIL is showing us.

We had priced them HIGH BAIL 1,195 and HIGH COURT 995. But on Aug 22 we needed a young guy to go in with the 4 does in the 1-2-3 Pen.

All four of the young guys we want to prove: HERC, MEADOW HAWK, HONDURAS, and HOT ROCKS were too closely related to one or more of those does so we picked HIGH BAIL. Now we will have testing fees and appraisals invested in him so he became \$1,795. But basically these two bucks are identical.

HIGH COURT - "One of American Dairy Goat Associations Sire Development Bucks"

HIGH BAIL - "One of American Dairy Goat Associations Sire Development Bucks"

Tad bit narrow from the back. Little topline. Sharp withers, Deep rump, Very good in the front. Almost tight toes. Very good shoulders.

In October Scott saw HIGH COURT and thought he was a little narrow from the front.

pro

Finished in only 4 shows, a total of 6 rings.
An ELITE DOE (which strictly measures milk/fat/protein genes). VIOLET had "INVERSION" - more protein than fat. We chose VIOLET's twin VERN to breed the awesome does STARGATE P.33 and VENICE P.28a. Nine pounds at birth. We named the dam to honor Tina Gilchrist's immortal GCH FOOTHILL FARM MEADOW SPRING TOP TEN LA 90. Dam had the big arc 35. And Rear Udder height: 38. Dam had extra teat. VIOLET started life with the RENOV steep rump. That changed. We don't want to waste time on conformation but one item we do want is "The Big Arc"! We used to have big wide escutcheons. When CRUZERIO did 5100, totally smashing our previous record, everything became lined on her. Then we lost the Big Arc. SPRING's descendants will bring it back. As of November 2012, Violets lifetime was 1,396 days 15,575 milk. She had cream, not white hair and an undesirable Saanen nose. It's so easy to be the top Saanen milk herd. The other breeders select for color and noses. We can just keep selecting for milk/fat/protein, all wrapped into one number called "percentile," or "Rank". VIOLET "HAD IT ALL"

It is very unusual for their to be two straight generations of 92's. There are very few Saanen 92's in any given year.

That said the SGCH's and the Top Tens make HAWK a Spotlight Sale buck. But the sale is in Texas, not dairy country, this year. HAWK is longer than the other buck kids like his dam and her brother, MEADOW BOSS, one of our main herd sires.

This one hurt! MEADOW HAWK had a full brother, MEADOW HARK 2. He got what we call "the Bulldog" - front shoulders loose, front legs crooked-bowing out, winging out.SALE BARN.

A \$5,000 hurt.

He was number one on the Elite Buck list when we bought him
Died February 20, 2016
When we bought him in Fall 2015 he was NUMBER ONE on the Elite
Buck List.
We knew that some of our bucks would eventually prove higher. But
we were desperate for an outcross. We were too inbred. Scott
always wanted an ELF descendant, but they kept ending up with
only one udder half.
He looked better than an 89 to Scott.

Probably our best doe as of Nov 2014

299 3947 113 2.9 108 2.7 NSBA GOLD SEAL missed Top Ten by 39lbs.

DDDDD: **STARGATE!** Our best doe ever.

EKORIA is not the best for our handmilking customers. When she is tight it is difficult to milk with both hands and get both streams in the bucket. As soon as you are about one third of the way through it is no problem.

EKORIA has one of the best bodies in the herd, but the mammary is not pretty.

As a kid, EKORIA got the Appraiser's highest rating. (About 100 Kids)

When the mammaries came out, EXTRA ALOHA zoomed right by her.

HAN SOLO has a terrific escutcheon arc and EKORIA is a 99thile doe. That combo is why he is so expensive. He is bigger and more vigorous than the other buck kids his age. He is extremely friendly. Like many CAPRIKORN Saanens his shoulders are loose. He will end up being used here. and we don't care about lactation numbers like 3500 or 4500. We use the percentiles also called rank. But we probably won't use him until August of 2017.

HAN SOLO - "One of American Dairy Goat Associations Sire Development Bucks"

He was priced at 7,995. We assumed he would not be bought and we would use him here in August 2017.

NOW in Spring of 2017 EKORIA has given us a new buck kid, Not Sired by ECLIPSE.

Almost all our young sires are ECLIPSE sons. We have way too much ECLIPSE in our bloodlines. SO WE KNOCKED HAN'S PRICE WAY DOWN.

DD: TSM VANUSKA 10*M 90th %ile

BIZNES is Polish for business. ZINUSKA 97%ile. SEND THE MILK CHECK.

BIZNES is so wide in the rear he did the spread eagle as a kid. He is the perfect line breeding on NYMPHIE, p. 54. When she was alive, she was every visitor's favorite. NYMPHIE had big milk, wide rump, fore udder going way up.

BIZNES is good looking.

BIZNES has 23 registered dau's as of January 2016.

If you are a dairy farmer, the fact that CAPRIKORN used him extensively is your best clue that he is GOOD.

BIZNES has only 3 rated dau's as of Aug 2016. Their ranks are 96, 85, 86. Average 89.

Their dam's ranks are 81, 59, 95, Average 78.

So he is raising them a lot, but it is too small a sample.

WARNING: He will be 6 years old in 2017. Many Saanen bucks' last year to work is 7 years old. So you may only get two years. Or even one.

COBALT already has milking dau's at CAPRIKORN. He is a fundamental part of our breeding program. His sister went for 2,600 and his brother went for 2,395 So Alice jacked up the price because she would like to have a ROCKET son for a change. All the others were bought This was an awesome looking baby buck. He had that sweeping look judge's love, starting from high sharp withers, traveling back along straight topline to a very good rump angle, being lower in the rump than the withers. Then he became a yearling. Our yearling bucks are ugly. One place Scott can fault him is the rump could be wider. Secondly, ZURICH has a slight minus for PTAFS.

Cobalt is plus for type.

His PTAM, PTAF and PTAP% would make him about the equivalent of 95%ile. But although he has 24 registered dau's none have ever been on a test in a DIFFERENT herd than CAPRIKORN. So he does not print on the Top Buck (cdcd.us) or Elite Buck lists. IT IS RARE

FOR A 95th %ILE BUCK TO ALSO BE POSITIVE FOR TYPE.

You get the best one! Which right now is CZARBUCK Because
CZARGATE has a broken back leg. We sell semen from him. TWO OF
CZARBUCKS KIDS WERE NARROW AND WEAK WHENVIEWED FROM THE FRONT. We
haven't seen enough of them to know if this is a trend or just a
fluke. Same dam. CZARGATE is making what we call "folded ears".
Where this comes from we have no idea. His babies have it but
almost all of them straighten out when they get older. Of course,
dairy farmers don't care because CZARGATE GETS THE MILK CHECK UP!
But if you are a devotee of "true Saanen breed type" you would
avoid CZARGATE.

DD: CHERRY BLOSSOM

We bought SNAP as a backup in case POPPER died. But with the new Nov. 2013 USDA numbers we began to think he might be a hair better. So we used him instead. SNAP has three daughters at the top of the grade Elite Doe List. SNAP HAS A ptam OF PLUS 309. Tht would make him #2 on the Alpine Buck List. But he cannot get on the list because all his tested dau's are in the one herd - CAPRIKORN.

We are not Alpine Breeders. We invested a lot of time in a circuitous manner to obtain SNAP in order to strengthen the Saanen gene pool. SNAP has no further purpose here as we have graded up his descendants to American Saanen status.

Here's how you know SNAP is worth way more than \$950.

We picked him to breed CUMIN, who has lead our herd in milk two straight years and is on her way to a third straight year.

Best Udder in Show versus 24 milkers!

Now here is a doe that did 15.0 on February 28, 2015 when she was born in 2006. WIARA's last buck went to Canada for 1,995.

She now has 23,302 lb. Lifetime

BING's dam freshened at 8 or 9 months. So did WIARA. That's why we bred them! Every doe that is not milking is costing you money. Get ERA or NEW ERA so that your herd will stop standing around dry and start getting the milk check-up.

WIARA is the oldest doe in the herd and still bringing home the bacon as of May 2014. 14.5 lb/day!!

WIARA gave us the beautiful, big producing ANDROMEDA who sold for \$2,895. BING is the friendliest, smartest buck but he is a little small for his age so far. Judge Katie Wolf rated these Two #4 and #5 in looks out of 37 buck kids in May 2014.

They competed Versus 4 other buck kids on June 8 and the consensus of 3 judges is that NEW ERA is the best looking of this year's CAPRIKORN buck kids, and ERA second.

After ERA was reserved, the Appraiser came on July 11 and made

ERA VVEcV and NEW ERA only +V++! So kids change fast.

AND SHE ALSO WINS THE LIFETIME FAT AWARD.

Lifetime now **18,000 pound and climbing.**

DD: SG DAUGHTER'S X ILEX 9*M TOP TEN TWICE LA-89

Just so we're honest with you, yes ALEX has a 90! And yes, her
dam an 89. But her two sisters, same get, were UGLY. So there are
some ugly genes contained in ELEX
On July 28, 2014, Scott said: "This guy looks GREAT".

On August 15, 2014, Scott said "This guy is huge". We are using
him as the Clean Up buck. ("Clean Up" is the guy we pen breed
half the herd to after they have been individually bred.) BIG
handsome guy.
Notice the other breeders are selling you bucks that they
themselves ARE NOT USING in their home herd.

Scott has to fault him on his rear end assembly being a little
close. But he picks up big points from the scorecard for having
withers sharp as a knife. Never Shown. Got sick day before our
one buck show of the year.

S: CAPRIKORN ZEPPO CZARBUCK *B - not proven - YET.

SD: SG CAPRIKORN KRUG'S STARGATE 1*M

1ST PL 3 YO & BU vs 24 milkers June 24, 2006

305 days 5140 pounds #1 in USA NSBA GOLD SEAL

305 days 5367 pounds #1 in USA 2x NSBA GOLD SEAL

One of only two Saanens in history of the U.S. that had two lactations of over 5,000 pounds in 305 days.

05-10 305 3653 109 2.9 04-08 377 6105 176 2.9

04-08 305 5367 150 2.8 #1 in the USA (over all breeds)

02-08 305 5140 160 3.1 #1 in the USA (over all breeds)

01-08 305 3220 87 2.7

Best Udder in Show versus 24 Milkers!!

DDS: SG SHERRY'S TSM HELSA'S YELSON +*B - Probably our milkiest buck

DS: CAPRIKORN YELSON STARBY *B - son of **STARGATE**, our best doe ever - The new USDA ratings came out August 2014 and STARBY is a #5 All Time Saanen Buck!

D: CAPRIKORN STARBY DOBRE - top milking yearling - also looks great 98%ile

DD: SG CAPRIKORN RV YGERNE 12*M **TOP TEN** LA-92 9th place at Nationals.

YEARLING LA-86 +EEV Jermain

LA-91! 3yo Jermain

LA-92! EEEE 4yo White

03-11 269 4427 129 2.9% 120 2.7% should be Top Ten

She was on pace for 5,000 in 305 June 2012.

YGERNE was cruising at 19lb per day in may 2011 and going up. Had (more protein than fat) but it changed.

HAD A SHOT AT 5,000 THIS LACTATION!! The trip to colorado and back slowed her down. 10th Place 4 y.o. at 2012

Nationals!! (out of 19) Ben Rupchis, an extremely picky breeder, is starting a new super herd. He chose YGERNE's son as his herd sire.

DOBRE prounced DOUGH-brayis clearly the milkiest yearling out of about 30. AND originally we rated her about the 3rd to 5th showiest, miracle of miracles! Then Judge Wolf picked her out over all our yearlings to make the trip to Nationals. THEN she defeated ZTARTREK, AIRACOBRA, and CASSIOPIEA on sept. 13, 2014!! (Normally YEARLINGS DO NOT DEFEAT OLDER MILKERS!) So after we prove out BLUE and BULGING EYE and BOSS and ELEX #471, ELYAN will be our next herd sire. Unless someone buys him. ELYAN's first couple kids look great, but it's too soon to tell A Lot will depend on how CZARBUCK proves out.

AND headed for another top ten, two in a row

DD: SGCH CAPRIKORN WEALTH XTORT 2*M LA-91 26,000 lb. 2,000
days.

WINNER - LIFETIME MILK AWARD - 2014 NATIONALS

grades

XTORT'S LIFETIME FAT IS AMAZING, SHE HAS
AROUND 900 LB

The second highest lifetime fat in the herd
is only around 600 something.

5145 has a large straight single horn. URRRGH. We are using him
here. In her 2 y.o. lactation, CUMIN beat the entire herd, young
and old. So far in 2015, as of May 1st, she is headed towards
beating them all again. On her April 30th test, she beat the
whole herd.

When you see her huge mammary it is obvious what is happening
without studying the DHI printouts. The mammary is shaped o.k. It
is just set too low for the judges.

CAPRIKORN XING FLINT #576 Born February 1, 2015
American Saanen **AVAILABLE** **\$1,495**

SS: TSUMOON *B A Sire Summary Buck
S: SG YELSON *B P.15 Recent Bucks - Probably our milkiest buck until his son STARBY came along

Winner of total doe award, 2011 National Show. Total doe equals milk, show placing, linear appraisal. XING won all four Milk Awards on July 25, 2011. And was TOTAL PERFORMER again in 2014.

DD: SGCH CAPRIKORN RAMSES VVS1 "ROCKET" 5*M **LA-91** TWICE

Ending her life with 2072 days 22,861 pounds milk, 792 fat, 650 protein. Highest LIFETIME fat and protein in the herd at the time of her death.

Highest Lifetime Milk Award at 2014 National Show.

We have his son HONDURAS from a doe even stronger then XING so we can let him go.

CAPRIKORN RUMI FALCON #582 AS1732876 Born February 2,2015
American Saanen

\$645 Reserved

An NSBA kind of buck - Show and milk.
Not an Amish Dairymen kind of buck.
Because of DESNA is around 80th %ile and RUMI is around 80th %ile
and that means falcon is milkier then 4 out of 5 bucks FROM
TESTED HERDS. And we can always get you something better then
that.

9th place at nationals
DD: AIRACOBRA - Show List LA-92 - 9th 3 y.o. at nationals

This is Scott's pick for best looking buck.
October 4,2015 Ben Placed him second of 9.
But keep in mind that ADGA judges get "best looking" by starting
at nose end and going back. Whereas Scott starts by looking at
the buck kid from behind.

A dairy farmer wrote in with the question:

"Is it really worth paying more for the more expensive buck?"

Scott wrote back, in Spring 2016:

"The answer is I don't know.

Here is one dollar and cents approach I thought of.

There are 16 **99th** %ile does. The average PTAM of those 16 is 333.

There are 16 **95th** %ile does. the average PTAM of those 16 is 230.

So it looks like for every one percentile drop the milk goes down by 26 pounds. HENOOSKI had a dam with a PTAM of a 93 so that would be 7 percentiles down from HAN SHOT FIRST.

26 pounds times 6 percentiles = 156 lb /year. So that would mean on average his daughters will give you 156 less pounds every year, year after year. And his granddaughters will give you one - half of 26 pounds year after year. So if you are milking 80, then $80 \times 26 \times 7 \times .41/\text{pound} = \$5,970$

80 does times 156 pounds equals 12,480 pounds per year.

12,480 pounds per year @ \$40cwt = \$4,992.

5 years of milk from each doe equals \$24,960.

That's my guess."

A lot of work needs to be done to make this computation more accurate.

First, what about the granddaughters and great granddaughters? Nothing was added to the \$24,960 for them.

Second, probably starting by comparing the 99th percentile to the 95th percentile is not right. Because the 99th percentile will have a few that are REALLY crazy for milk.

So, if we found 16 does in 85th percentile and averaged their milk (PTAM). Then subtracted that number from 230, which is the average for the 16 in the 95th percentile. That would give us the

drop for ten percentiles. Dividing that by 10 would probably give us a more accurate figure than 26 pounds per percentile.
