2017 Bucks for Sale

November 15, 2017

In WordPerfect under: 2017 Bucks for Sale

If you want one, send a deposit of 10% (or a \$100 minimum) and a contract2

*Contract2 is behind the button, "Order Forms," on the website.
Or call us (301) 834-8030 and we will fill it out!

THANKS!!

A dairy farmer wrote in with the question:
“Is it really worth paying more for the more expensive buck?”

Scott wrote back, in Spring 2016:

“The answer is I don’t know.

Here is one dollar and cents approach I thought of.

There are 16 **99th** %ile does. The average PTAM of those 16 is 333.

There are 16 **95th** %ile does. the average PTAM of those 16 is 230.

So it looks like for every one percentile drop the milk goes down by 26 pounds. HENOOSKI had a dam with a PTAM of a 93 so that would be 7 percentiles down from HAN SHOT FIRST.

26 pounds times 6 percentiles = 156 lb /year. So that would mean on average his daughters will give you 156 less pounds every year, year after year. And his granddaughters will give you one - half of 156 pounds year after year. So if you are milking 80, then $80 \times 26 \times 7 \times .41/\text{pound} =$
\$5,970

80 does times 156 pounds equals 12,480 pounds per year.

12,480 pounds per year @ \$40cwt = \$4,992.

5 years of milk from each doe equals \$24,960.

That’s my guess.”

A lot of work needs to be done to make this computation more accurate.

First, what about the granddaughters and great granddaughters?
Nothing was added to the \$24,960 for them.

Second, probably starting by comparing the 99th percentile to the 95th percentile is not right.
Because the 99th percentile will have a few that are REALLY crazy for milk.

So, if we found 16 does in 85th percentile and averaged their milk (PTAM). Then subtracted that number from 230, which is the average for the 16 in the 95th percentile. That would give us the drop for ten percentiles. Dividing that by 10 would probably give us a more accurate figure than 26 pounds per percentile.

TESTIMONIALS

“The Caprikorn does are amazing. They so out class the rest of the herd it’s not funny.”

-Trent Hendricks, MO

“A big congratulations to your TOP TEN DOES last year. I keep reading on and on and kept seeing all your listed. Yea Caprikorn!”

-Tom & Roni, CA

“SPARKLE is milking GREAT!!! Thank you for breeding these quality goats.”

-The Jacksons, WV

“We LOVE our Caprikorn Farm goats – they are not only very productive, they are lovely personalities – smart, but not overly pushy.”

-Bedford Blueberry Goat Farm, MA

“I would say you are probably the top herd in the nation now with those classification scores and that milk production.”

-Janelle Anderson, 30-year Saanen Breeder, NE

“Our KID ROCK daughters are milking 10 pounds at 10 months of age!”

-Emanuel Schneider, PA

“By the way, HOT ROD is doing great. His girls have had their first kids. He definitely improved our genetic pool.”

-Andrea Gauvreau, Quebec

“Scott, bought seven does from OK. Had never seen such milk or quality in a goat herd. When asked about the genetics he said they were Caprikorn.”

“They are doing 18 pounds a day. The yearlings are doing 13 pounds a day.”

-Thomas Childress, Hereford Breeder, TX

“I am overly pleased with EARTHMAN and the improvements that I can already see that he has made to our farm.”

-Wendy, Bootleg Farm, GA

“My name is Shereen and I bought a buck from you a couple years ago. Fantastic buck - I love this buck!”

- Shereen Wilcox, PA

“We have 105 does..Just so you know the Caprikorns are the nicest and largest ones. We can always pick them out just by looking at them.”

-Lori Lyons, WI

“Dear Scott, that is some Sales List! I know your goats are the BEST!”

-Brad Parker, Pipe Dreams Fromage, PA

“Hey Scott, I got to milk some of your best goats when Alice was here; was impressed!”

-Levi Petersheim, IA

“The Caprikorn girls are doing FANTASTIC! They are exceeding our expectations. They are always coming in with full bags and they don’t want to slow down production very quickly when it is time to start drying up.”

-Jared Rebling, Brighton, IA

“AMBER is a milk machine. I appreciate the temperament of all your goats; they are so nice and loving!”

-Scarlett Payne, Utica, OH

“A lot of the ones we have from your bucks freshened at 11 months and they’re just fantastic.”

-Keith Tiffit, VT

“DILL and DYLEX are **amazing**, and as milking yearlings were amazing also...”

-Lila Streff, SD

“I appreciate that you are willing to refund our deposits; we have decided to back out of all 11 dairy goat kids.”

- Trisha Bickel, Hamburg, PA

“I have appraised all the major Saanen herds and you have the best feet and legs.”

-Linear Appraiser, American Dairy Goat Assn., 2013

“I am so very glad to be able to work with you as you are one of the most reliable and honest goat breeders I know. It is such a pleasure to have complete confidence in a purchase to know that it will be totally as represented”

-Teddy West, OH

Update August 14, 2017

The **95th** percentile does average **243** per PTAM.

The **98th** percentile does average **302** per PTAM.

Increase of **59** pounds per year.

There are **3** percentage points between **95 & 98**.

Therefor each percentile translates into **20** pounds of milk per doe per year.

So, for example. If I have a normal non tested herd, that might be **40th** percentile.

If you use **90th** percentile bucks long enough, you move up by **1,000** pounds per doe per year.

The **99th** percentile moves you up much more than **20lb**.

Here is a list of the 2017 bucks that are still HERE
as of November 14, 2017.

There are no page numbers - they are listed in Birthday order

04-08 324 4336 133 3.0% 112 2.6%

WIDEST udder in the herd. VERY IMPORTANT. You can't make them too low. You can't make them stick out in the back or they pee on them. So make them wide! "

On 6/15/16, Scott said HIGH BAIL looks great but has loose shoulders. On 7/25/16 four Amish Dairymen were here and HIGH BAIL was in consideration. But he was not one of the three they picked. What Scott saw was “A lot of dairy character, very good escutcheon, good-looking, maybe a little top line weakness if you are looking for it.” There may be other BAR EXAM buck kids some day. But none sired by ECLIPSE, who died.

HIGH COURT is more stylish on the move. It is hard to say how much top line dip he has with all the hair along his top line. But we are milk breeders so we prefer the slight advantage in width both from the back and from the rear that HIGH BAIL is showing us.

We had priced them HIGH BAIL 1,195 and HIGH COURT 995. But on Aug 22 we needed a young guy to go in with the 4 does in the 1-2-3 Pen.

All four of the young guys we want to prove: HERC, MEADOW HAWK, HONDURAS, and HOT ROCKS were too closely related to one or more of those does so we picked HIGH BAIL.

Now we will have testing fees and appraisals invested in him so he became more expensive.

HIGH COURT – “One of American Dairy Goat Associations Sire Development Bucks”

HIGH BAIL – “One of American Dairy Goat Associations Sire Development Bucks”

Tad bit narrow from the back. Little topline. Sharp withers, Deep rump, Very good in the front. Almost tight toes. Very good shoulders.

In October Scott saw HIGH COURT and thought he was a little narrow from the front.

DSS: ARTURO +*B

DS: SG DAUGHTER’S UTAH +*B

DSD: SG DAUGHTER’S ROSEA 6*M

D: SG DAUGHTER’S X ILEX 9*M: #799 The second pillar of the Old Red Line Family
American Saanen Tall, upstanding **TOP TEN TWICE – LA-89**
especially for the dairy farmer after PROTEIN.

Not a good value if you get paid a flat rate for milk. (A few dairies still pay without counting B.F and Pro %’s)

S: SG UTAH *B - a former Elite Buck

D: SG CARRA 8*M also 99th %ile

One of only two does here still alive here that made TOP TEN twice.

1-01 269 1803 65 3.6 64 3.5%

2-01 305 4120 131 3.2% 131 3.2% NSBA GOLD SEAL – TOP TEN

6-02 225 1959 68 3.5% 63 3.2%

6-10 311 2540 82 3.2%

7-10 267 1352 49 3.6% 42 3.1%

Lifetime 2268 days 21,380 milk 724 fat 691 protein

We reserved this doe before she was born. Then, per the contract, we got the pick of three doe kids.

ILEX was a 99th percentile doe and her dam CARRA was a 99th percentile doe. At that time there were only 16 living Saanen 99th percentile does. 99 is as high as USDA goes. ILEX beat the whole herd in milk/fat/protein. 3.2% is as high as Saanen’s go in protein. An upstanding doe with no attachments.

She is a tribute to Cecile Beauchemin, who had the will power to stay on DHI test for years, and to always breed to Sire Summary/Top buck List/ Elite/ Top 15% bucks. Never bothered to show. We said: “She is dying as of April 2016.”

After being dry for most of 2016, SHE KIDDED FEBRUARY 2017 AT TEN YEARS OLD!

DDS: SG DAUGHTER’S BEN +*B

DD: SG DAUGHTER’S CARRA 8*M

DDD: SG DAUGHTER’S WILLOW 7*M

It is almost certain this will be the last kid from the great ILEX.

05-01 305 3327 99 3.0% 93 2.8% NSBA SILVER SEAL
Ended with Lifetime 1,396 days 15,575 pounds 2.8 b.f. 2.8 pro
Finished in only 4 shows, a total of 6 rings.

An ELITE DOE (which strictly measures milk/fat/protein genes). VIOLET had
"INVERSION" - more protein than fat. We chose VIOLET's twin VERN to breed the
awesome does STARGATE P.33 and VENICE P.28a. Nine pounds at birth. We named
the dam to honor Tina Gilchrist's immortal GCH FOOTHILL FARM MEADOW
SPRING TOP TEN LA 90. Dam had the big arc 35. And Rear Udder height: 38. Dam
had extra teat. VIOLET started life with the RENOV steep rump. That changed. We don't
want to waste time on conformation but one item we do want is "The Big Arc"! We used
to have big wide escutcheons. When CRUZERIO did 5100, totally smashing our previous
record, everything became lined on her. Then we lost the Big Arc. SPRING's descendants
will bring it back. As of November 2012, Violets lifetime was 1,396 days 15,575 milk.
She had cream, not white hair and an undesirable Saanen nose. It's so easy to be the top
Saanen milk herd. The other breeders select for color and noses. We can just keep
selecting for milk/fat/protein, all wrapped into one number called "percentile," or "Rank".
VIOLET "HAD IT ALL"

It is very unusual for their to be two straight generations of 92's. There are very few Saanen 92's
in any given year.

That said the SGCH's and the Top Tens make HAWK a Spotlight Sale buck. But the sale is in
Texas, not dairy country, this year. HAWK is longer than the other buck kids like his dam and
her brother, MEADOW BOSS, one of our main herd sires.

This one hurt! MEADOW HAWK had a full brother, MEADOW HAWK 2. He got what we call
"the Bulldog" - front shoulders loose, front legs crooked-bowing out, winging out. SALE BARN.
A \$5,000 hurt.

HAWK - "One of American Dairy Goat Associations Sire Development Bucks"; seems a little
passive

3rd at Nationals "Scott said Will Go Up"
01-07 328 3147 113 3.6% 91 2.9% "Now he says again "will go up"
02-07 305 3540 112 3.2% 101 2.9%
03-09 305 3925 128 3.3% 102 2.6%
04-08 305 4221 128 3.0% 108 2.6%
04-08 324 4336 133 3.0% 112 2.6%

WIDEST udder in the herd. VERY IMPORTANT. You can't make them too low. You can't make them stick out in the back or they pee on them. So make them wide! "

On 6/15/16, Scott said HIGH BAIL looks great but has loose shoulders. On 7/25/16 four Amish Dairymen were here and HIGH BAIL was in consideration. But he was not one of the three they picked. What Scott saw was "A lot of dairy character, very good escutcheon, good-looking, maybe a little top line weakness if you are looking for it." There may be other BAR EXAM buck kids some day. But none sired by ECLIPSE, who died.

Full brother HIGH COURT is more stylish on the move. It is hard to say how much top line dip he has with all the hair along his top line. But we are milk breeders so we prefer the slight advantage in width both from the back and from the rear that HIGH BAIL is showing us.

We had priced them HIGH BAIL 1,195 and HIGH COURT 995. But on Aug 22 we needed a young guy to go in with the 4 does in the 1-2-3 Pen.

All four of the young guys we want to prove: HERC, MEADOW HAWK, HONDURAS, and HOT ROCKS were too closely related to one or more of those does so we picked HIGH BAIL. Now we will have testing fees and appraisals invested in him so he became more expensive.

HIGH COURT – "One of American Dairy Goat Associations Sire Development Bucks"

HIGH BAIL – "One of American Dairy Goat Associations Sire Development Bucks"

Tad bit narrow from the back. Little topline. Sharp withers, Deep rump, Very good in the front. Almost tight toes. Very good shoulders.

Finished in only 4 shows, a total of 6 rings.

An ELITE DOE (which strictly measures milk/fat/protein genes). VIOLET had "INVERSION" - more protein than fat. We chose VIOLET's twin VERN to breed the awesome does STARGATE and VENICE. Nine pounds at birth. Dam had the big arc 35. And Rear Udder height: 38. Dam had extra teat. VIOLET started life with the RENOV steep rump. That changed. We don't want to waste time on conformation but one item we do want is "The Big Arc"! We used to have big wide escutcheons. When CRUZERIO did 5100, totally smashing our previous record, everything became lined on her. Then we lost the Big Arc. SPRING's descendants brought it back. As of November 2012, Violets lifetime was 1,396 days 15,575 milk. She had cream, not white hair and an undesirable Saanen nose. It's so easy to be the top Saanen milk herd. The other breeders select for color and noses. We can just keep selecting for milk/fat/protein. She "HAD IT ALL". VIOLET'S dau SGCH MEADOW ZEPHYR also has a 92.

DD: CAPRIKORN MEADOW SPRING - named after Tina Gilchrist's doe

DDD: CAPRIKORN MEADOW NYMPH LA-90 Founder of NYMPHIE FAMILY

MEADOW BOSS has the numbers to be on the Elite Buck List.

As of March 2017 - Milk Plus 178, Fat plus .06, Protein minus .02

For example ELKO is Milk Plus 100, Fat plus .07, Protein plus .06

And ELKO is 89th. So BOSS is around 93.

But the computer won't list him there until there is a tested dau in a SECOND herd.

We took BOSS to his first show on June 8th of 2014. He was 3rd of 3 in Rings 1 & 2. He was second of three in Rings 3 & 4. In Ring 4, the buck that beat him went on to be the Grand Champion.

He is longer and taller than other Saanen bucks with very sharp withers. He looks awesome from the side and he is too narrow viewed from the rear. In 2012 Ben Rupchis placed him first over the other "B" bucks (BULGING EYE, STARBY, BIZNES) in spite of the narrow rear end. BULGING EYE and BIZNES went on to get 90's. But Scott doesn't think BOSS will get one. His full sister also has a 92 just like his dam. She is also a SGCH, just like his dam. She also has 22,000 pounds lifetime and climbing.

Scott was so excited about ZINNUSKA he kept her from being sold, he also made
her miss her shots. She is headed for 305 4000! Her march 26, 2011 test was 18
pounds. We will be happy to send you her test sheets.

DSDD: SHERRY'S TSM VANUSKA 10*M

D: CAPRIKORN BIZ FLASH OPAL #567- Showiest of the yearlings

In Scott's opinion. #3 behind FLORENCE #577 and FIRE QUEEN #529 at nationals. Also was
having a very good baby lactation.

11.5, 11.0, 10.5, 13.5 then 3.5 Got Mastitis
projected at 3354 102 84 before mastitis
96th percentile before mastitis

DD: CAPRIKORN BING DIAMONDS R 4EVER

DDD:SGCH CAPRIKORN RAMSES VVS1 5*M "ROCKET" 5*M LA-91 2X
WINNER OF LIFETIME MILK AWARD over all Saanens July 2013 & again
July '14 AND 3.5% lifetime fat
3.06 305 3894 131 3.4% 109 2.8%
lifetime 2,072 days 22,781 lb milk 3.4% fat

FLASH was the highest milking yearling on the yearlings first test.
And the highest projection after the second test.

Dam is a show star, but not the very top of our milk. The Sire, however, should kick the milk up
through the roof. So HOT ROCKS is worth the investment if you want a lot of help with your
udders and feet in ADDITION to big milk checks. But if you only need milk/fat/protein, skip on
to a cheaper guy.

We said "FLASH is going in the ring at the Nationals July 4th and if she smokes them, HOT
ROCKS price will go up." She didn't kill them but she did really well. So we took the price from
\$1,995 to \$2,795.

UPDATE -On August 7th the cdcB ratings came out and FLASH got a 96th %ile and
CZARGATE got a rating high enough to make him #1. After mastitis the ctr knocked her down
to 89 from 96. Except he only has daughters in one herd. So we took HOT ROCKS from
\$2,795 to \$5,995 because he suddenly is the buck of the year and we want to use him in our
breeding program.

On September 23, 2016 failed to collect semen while A/I guy was here.

Scott is giving him Ec. The appraiser gave him a +EcV+. Scott says excellent topline,
Excellent width front and back. Looks great on the move. Excellent head and rear leg angulation.
Not friendly enough. Shoulders are good not great. VG BC. Clean front legs. Back heels are a
little shallow.

One of only two Saanens in the history of the U.S. that had two lactations over 5,000 pounds in 305 days or less. Every 10 or 15 years nature sends us a genetic freak. Best Udder versus 24 milkers at District 3 Saanen Specialty.

D: CAPRIKORN CZARGATE FLORENCE #577 **99th** percentile 4th PL MIKING YEARLING AT NATIONALS

DIED SUDDENLY SEPT 5, 2016.

a very good looking first freshener. Even better looking than STAR FLEET. FLORENCE was leading all the yearlings in milk. The double whammy - FLORENCE was our top yearling milker entry at the Nationals July 4th, 2016. And she had tight shoulders. V per the appraiser. Viewing the herd as whole on the average our number one conformational weakness is shoulders.

DDS: SG YELSON +*B p. 15 Recent Bucks. Previously we thought he was our milkiest buck before his son STARBY took over

DD: SG CAPRIKORN YELSON CHEYENNE 5*M #2143 AS1614179 97%ile

Young Stock Ec

LA-90 Second place Dam and Dau Nationals July 4, 2016

01-06 305 2716 81 3.0% 77 2.8%

2-06 306 3617 122 3.4% 103 2.9%

We said "Will probably be 1st place Jr. Yearling at 2013 Nationals." two years ago in this catalogue. WAS ACTUALLY 2ND PLACE ON JULY 9, 2013!

And on July 4, 2016 she was 12th place 3 year old.

If you saw CHEYENNE you would know right away you want her kids. Her dam was ranked 99th percentile and her sire is our best milk buck out of those with a positive PTAFS. It was scary to think how good CHEYENNE could be. As a kid she has been shown only once and was Grand Champion. In milk, before she turned two, she was first in both rings as a milking yearling. Then we stopped showing her. It's too bad U.S. breeders put way too much weight on mammaries and way too little weight on milk/fat/protein. But that IS the way it IS. Feb. 19, 2014 maybe an E mammary – maybe not enough fore. Fabulous rear and teats. Shown only once in 2015 and of course she could not beat CASSIOPEIA. CHEYENNE got coded "A" for acceptable for feet. Bad. smh codes J 88, Ec WS, 90 KS

DDD: SG CAPRIKORN RENOV'S WINNEMUCCA 4*M

02-09 305 3729 153 4.1% 119 3.2%

LA-90 VEEE

We took FLORENCE to a show the Saturday before Memorial Day 2016 and she beat four of our other yearlings in all three rings. We took HONDURAS to a different show on June 5 and he was 4th of 4 in one ring and 2nd of 5 in the other. As of Sept. 2016 we are using HONDURAS on some of our "milk and Show" NSBA type does. Awesome BC beyond excellent. Right rear heel is shallow. Very friendly, Excellent escutcheon. VG rump angle.

DS: CAPRIKORN RENOV VANDERBILT +*B "MOOSE" huge former Elite Buck

D:SG CAPRIKORN RV YGERNE 12*M TOP TEN LA-92 9th place at Nationals – previous page
Ben Rupchis purchaed YGERNE's son DEBLIN.

DD: SG CAPRIKORN TZAR'S WANUSKA 11*M a looker 01-04 305 2341

DOBRE is probably our best all around doe, from the point of view of people who care about both milk and show. But she cannot claim that title until we see another lactation. Her litter brother DEBLIN was bought for \$ 2,500 by a Very knowledge herd manager in California.

In September 2014, at Frederick, the judge shocked everyone by placing DOBRE over every single Caprikorn Show Doe. EVEN THOUGH SHE WAS JUST A YEARLING.

DOBRE is friendly. . DOBRA lives in Texas now, where she is on test and doing great.

DOBRE EX Rear., cannot see fore?? Extension is between moderate and VG, but more is a pocket DOBRE was 13th of 19 at 2014 National Show. Cuts are no brisket, rump angle, shoulders not tight enough to withers. Rump Angle will be fine as she ages. Her dam YGERNE also placed well at Nationals.

DOBRE failed to get pregnant in Fall of 2014. Finally kidded in 2016. Started with a devastatingly disappointing first test of only 12.5.

Whereas her sister DOBRA in another herd (Texas) started 17.1, 16.1, 14.3!!

When you reserve a doe kid in advance, and two of them are born, we try to send YOU the best one.

Finished in only 4 shows, a total of 6 rings.
An ELITE DOE (which strictly measures milk/fat/protein genes). VIOLET had "INVERSION" - more protein than fat. We chose VIOLET's twin VERN to breed the awesome does STARGATE and VENICE. Nine pounds at birth. Dam had the big arc 35. And Rear Udder height: 38. Dam had extra teat. VIOLET started life with the RENOV steep rump. That changed. We don't want to waste time on conformation but one item we do want is "The Big Arc"! We used to have big wide escutcheons. When CRUZERIO did 5100, totally smashing our previous record, everything became lined on her. Then we lost the Big Arc. SPRING's descendants brought it back. As of November 2012, Violets lifetime was 1,396 days 15,575 milk. She had cream, not white hair and an undesirable Saanen nose. It's so easy to be the top Saanen milk herd. The other breeders select for color and noses. We can just keep selecting for milk/fat/protein. She "HAD IT ALL". VIOLET'S dau SGCH MEADOW ZEPHYR also has a 92.

DD: CAPRIKORN MEADOW SPRING - named after Tina Gilchrist's doe
DDD: CAPRIKORN MEADOW NYMPH LA-90 Founder of NYMPHIE FAMILY

MEADOW BOSS has the numbers to be on the Elite Buck List.
As of March 2017 - Milk Plus 178, Fat plus .06, Protein minus .02
For example ELKO is Milk Plus 100, Fat plus .07, Protein plus .06
And ELKO is 89th. So BOSS is around 93.
But the computer won't list him there until there is a tested dau in a SECOND herd.

We took BOSS to his first show on June 8th of 2014. He was 3rd of 3 in Rings 1 & 2. He was second of three in Rings 3 & 4. In Ring 4, the buck that beat him went on to be the Grand Champion.

He is longer and taller than other Saanen bucks with very sharp withers. He looks awesome from the side and he is too narrow viewed from the rear. In 2012 Ben Rupchis placed him first over the other "B" bucks (BULGING EYE, STARBY, BIZNES) in spite of the narrow rear end.

BULGING EYE and BIZNES went on to get 90's. But Scott doesn't think BOSS will get one. His full sister also has a 92 just like his dam. She is also a SGCH, just like his dam. She also has 22,000 pounds lifetime and climbing.

0-11 305 1810 55 54

STARGATE - Laid back, unassuming, matter of fact, and just kept eating.

ONE OF 11 SAANENS ALL TIME WITH OVER 5,000 POUNDS IN 305 DAYS

And a smashing first lactation from a doe that kidded at 1yr 8 months of age! Shown once, 3rd of 5.

Shown 2nd time, RGCH to ROMANCE p.30. Shown 9/17/05, 3rd of 4. 4th time out GCH vs 14 over Diana Patton's entries and also DREAMCATCHER, the 2nd place National Show doe, on 5/27/06. 5th show 3rd of 7 same day. 6th show 2nd over Nelson Broadus. Full sister to ROAD SHOW, p.19, who is also a 90! Can never be a National Champion because shoulders are too loose. We didn't believe the Official Testers 21.0 so we weighed her exactly 6 hours after milking and got 5 lbs 7.5 oz.

STARGATE BEST UDDER at 2006 District III Saanen Specialty over 24 Milking Does!

In 1982 and '83, GCH HARTSELL'S HERD BB'S DOUG FRAN turned in lactations of 5110 and 5930, respectively. No other Saanen dairy goat had two 5,000 lb. 305's in the United States until STARGATE came along.

CAPRIKORN ZEPPU CZARGATE #2129 At least three of his kids have folded ears. On the plus side his two dau's with ratings are 98 and 92 as of July 2016. On the minus side CZARGATE had two sons from the great SGCH MEADOW ZEPHYR LA-92 Top Ten twice that were overly narrow.

Best Udder in Show vs 24 milkers!

DS: SG CAPRIKORN SNOW'S ZURICH +*B highest living ranked USDA Saanen buck
D: SG CAPRIKORN ZURICH CYLEX #2108 – above 99th %ile as of May 2016

DD: SG DAUGHTER'S X ILEX 9*M TOP TEN TWICE 98TH %ile -above

Weak pasterns, narrower rump than the other kids, hocks in.

Very friendly, comes up to be petted.

No Saanen has 3.4 protein. That was based on only 9 lab tests. We said, “so it should drop as the law of averages accumulates.” After 46 lab samples, she is down to 3.3% protein, highest of any Saanen we know. She has been one of the last to kid two years in a row. That is why the lactation starts with 1-02 instead of 1-00.

ATLANTIS – was 95%ile rank. Got very sick for a long time. Now 95th percentile again.

ATLANTIS friendly. In milk. Probably a “V” mammary. Definitely not an E in March of 2012. Really big, occasionally winging out, otherwise fabulous. After kidding in 2014 ATLANTIS was close to dying for weeks on end. We milked her lying down for weeks. So naturally the USDA has to give her a lower rating than she deserves. 91st%ile was still better than 9 out of 10 Saanens.

Video ATLANTIS: <http://www.youtube.com/watch?v=70YYn3JbhDc>

March 29, 2015 she’s BAAAACK! Atlantis drops 16.0 pounds at 35 days fresh. Aug. 1st 2015 USDA moves her up to 96% ile.

Awesome mammary. Except not the smoothly blended fore show people want. Why do we say “wise shopper?” Because all the normal dairy farmer asks is “How much did the dam milk?”

But the USDA computer program knows WHAT THE GENES ARE. And WHAT THE GENES ARE determines how much help a doe is going to give YOUR milk check in YOUR herd.

“How much did the dam milk?” is 80% Management. But your herd doesn’t have someone else’s management. What you need is genes.

The USDA computer program knows the genes because it knows what all the ancestors on test milked compared to their herdmates. AND it knows what all the descendents of all the ancestors milked compared to THEIR herdmates. Thousands of official tests compared to the 20 tests that went into a 4,000 lb once in a lifetime record for some other doe. And the GENES are what is going to show up year after year in YOUR herd. And the genes are better than 19 out of 20 Saanens. That IS what 95 percentile

SD: SG CAPRIKORN SNOW'S ZANONI 5*M

DS: COACH FARMS WILLEM'S SNAP 99thPercentile

D: CAPRIKORN SNAP ECLAIR #4114 99th percentile

November 2014, ECLAIR and ECLARE are both big for their age.

March 2015 one of them has teats so small the inflations fall off #4114?

September 2016 NOT any more!

CUMIN made the most milk of anyone in our herd in 2014. And she was only two.

ECLAIR, weird udder. Jeremiah says "teats are fat, angled out and down." Scott likes the udder a lot. So does the judge.

Width and fat teats.

ECLAIR is a keeper, thanks to her dam and her own milk records.

Previously NFS due to grading up process. Ok to sell now that we have 87.5% Saanen babies.

ECLAIR second of 14 at Frederick September 2016. But a lot of the competition was 4 H'ers.

DD: CUMIN - Possibly our best milker. Time will tell. Top Ten twice, maybe soon #3.

99th percentile LA - 90

305 5142 lb! LA-89. Scott says "LA -89 a little high. Not enough attachment."

We don't really want to keep 3/4 Grades. But HOT PEPPER has the looks on top of the milk. So we priced her to stay. Hopefully she will pop an ugly udder and a daughter and we can move her out. MILK; It is possible that this is our only doeling where both the dam and sire are 99%ile animals. HOT PEPPER has an excellent build. The Appraiser only gave her a "V". But she was our choice of all the kids to take to Nationals. Placed o.k. HIGHBALL and HOLLANDAISE live in Trinidad Tobago now.

Has front feet that turn out badly at the bottom, making his front legs knock Kneed.
Returning the buyer's deposit June 30, 2017.

04-08 324 4336 133 3.0% 112 2.6%

WIDEST udder in the herd. VERY IMPORTANT. You can't make them too low. You can't make them stick out in the back or they pee on them. So make them wide! "

On 6/15/16, Scott said HIGH BAIL looks great but has loose shoulders. On 7/25/16 four Amish Dairymen were here and HIGH BAIL was in consideration. But he was not one of the three they picked. What Scott saw was “A lot of dairy character, very good escutcheon, goodloooking, maybe a little top line weakness if you are looking for it.” There may be other BAR EXAM buck kids some day. But none sired by ECLIPSE, who died.

HIGH COURT is more stylish on the move. It is hard to say how much top line dip he has with all the hair along his top line. But we are milk breeders so we prefer the slight advantage in width both from the back and from the rear that HIGH BAIL is showing us.

We had priced them HIGH BAIL 1,195 and HIGH COURT 995. But on Aug 22 we needed a young guy to go in with the 4 does in the 1-2-3 Pen.

All four of the young guys we want to prove: HERC, MEADOW HAWK, HONDURAS, and HOT ROCKS were too closely related to one or more of those does so we picked HIGH BAIL. Now we will

have testing fees and appraisals invested in him so he became \$1,795.
But basically these two bucks are identical.

HIGH BAIL – “One of American Dairy Goat Associations Sire Development Bucks”

Tad bit narrow from the back. Little topline. Sharp withers, Deep rump, Very good in the front.
Almost tight toes. Very good shoulders.

In October Scott saw HIGH COURT and thought he was a little narrow from the front.

Dam of JALEX: CALEX2

DD: SG CAPRIKORN RENOV'S ZTARTREK - 2*M 99th %ile

"Really nice topline. Big, growthy kid. Shoulders on the loose side." Judge Wolf.

She put ERIDANA second to #486 on page p. 68a. The Appraiser put ERIDANA second to #443, ELBA, on page 14. We chose ERIDANA to be our entry in the Senior Kid Class at the 2014 Nationals. Her dam, CASSIE WAS OUR ENTRY IN THE MILKING 2 Y. O'S. Just when we thought we had an incredible Milk & Show double threat, the Nat'l show judge put her 18th out of 26. YECCHH! The big knock is loose shoulders.

She was BY FAR the biggest kid in the class.

When we picked her as our kid to represent us at the Nationals. 486 EXTORIA was cuter but half as big. Bad decision. Judge Flickinger didn't care about size and flunked her for loose shoulders.

TIP: There is a reason the milk in stores comes from cows. The expense of Milking Labor is the same for a BIG animal as for a small animal.

Aborted December 2014.

After Nationals, she beat everyone including the Cherry Glen Nat'l Show doe at Frederick in September 2014.

Freshened in very late in 2015, June 28, with radically uneven halves. Alice says that was caused by prefreshening mastitis. As of September 1, they are starting to be much more even., but still unshowable. Just freshened in 2016. Still uneven. This doe is a mystery. Need more tests. April 2016 test right in the middle of the 2 year olds, but bag is not even close to being full.

Friendly. She's really big. She's capable of cruising to well over 5,000 in 305 WITHOUT BEING PUSHED. We'll see. Update - #1 in herd April 2017 and May 2017 tests.

One Time Reserve Grand Champion - probably not a good judgment

To get the biggest milk check, try using a buck whose dam is 99th Rank. But that is half the story, even better is if his sire is also ranked 99. YELSON is not ranked yet, but his dam was 99.

After disbudding, BULGING EYE's right eye was swollen and it protruded. Also he was a little lethargic. Maybe he is blind in that eye. He is very friendly. This is a very handsome buck. We used him on Cleanup on about 15 does we tried to breed in August. It always worried Scott that he is not hyper like his Dad. But the computer has him at plus 302 for milk in March 2017. The highest rating on the Elite Buck List is plus 244.

BULGING EYE may be too dairy. He needs to be hooked up with your normal dairy doe, who is not dairy enough, or even better, a fatso. (His dam was "skin", bones, and mammary.) But its hard to find a "fatso" here.

A lot of the top milk bucks were quite lean, bordering on frail. VOICE OF REASON was a string bean. Strange.

We bred him to 15 in Fall of 2014 and 25 in Fall 2015.

We took BULGING EYE to his first show on Jun 8, 2014. He was first of three in Ring One, Second in Ring 2, First in Ring 3, and Third in Ring 4. In Ring One, he was Grand Champion versus 12.

In the 2016 3 Ring Buck Show he was Reserve to the Grand in all 3 rings.

In the 2017 Buck Show he was Grand in the first two rings so that means he is a Permanent Champion.

Smh-code j- a little low VV+V 90 also code J 90th 2BB

One Time Reserve Grand Champion

To get the biggest milk check, try using a buck whose dam is 99th Rank. But that is half the story, even better is if his sire is also ranked 99. YELSON is not ranked yet, but his dam was 99.

After disbudding, BULGING EYE's right eye was swollen and it protruded. Also he was a little lethargic. Maybe he is blind in that eye. He is very friendly. This is a very handsome buck. We used him on Cleanup on about 15 does we tried to breed in August. It always worried Scott that he is not hyper like his Dad. But the computer has him at plus 302 for milk in March 2017. The highest Elite Buck is plus 244.

BULGING EYE may be too dairy. He needs to be hooked up with your normal dairy doe, who is not dairy enough, or even better, a fatso. (His dam was "skin", bones, and mammary.) But such a doe is hard to find here. A lot of the top milk bucks were quite lean, bordering on frail. VOICE OF REASON was a string bean. Strange. We bred him to 15 in Fall of 2014 and 25 in Fall 2015.

We took BULGING EYE to his first show on Jun 8, 2014. He was first of three in Ring One, Second in Ring 2, First in Ring 3, and Third in Ring 4. In Ring One, he was Grand Champion versus 12.

In the 2017 Buck Show he won the first two rings to finish. (Now permanent SGCH)

In the 2016 3 Ring Buck Show he was Reserve to the Grand in all 3 rings.

Smh-code j- a little low VV+V also code J LA 90 code KS LA-90 #2 code BB

BULGING EYE's dam is 98th %ile as of December 2015. His only 3 rated dau's are 97, 97, and 99. But, only four rated Saanens is not enough data.

3-07 260 2784 84 3.0% 84 2.9% in progress

Has 2 LA-90's

DD: ZENUSKA - died young

It is easy to recommend FIRENZA! ANNENUSKA is 94th percentile, AND SHE IS PLUS 0.6 PTAFS, probably the highest combo of RANK to LOOKS in the herd, depending on how you weigh each of those factors. ANNENUSKA'S records are not impressive. But the USDA - DHIA rating of 94 knows what her GENES were, and it is her GENES that are being passed to FIRENZA.

As a yearling FIRENZA looks good but not great. FIRENZA is another name for Florence, Italy.

Smh VV+V code J +VV+ 84 BB

Why do we say "Opportunity for Dairy Farmers?"

Because FIRENZA is TOO YOUNG to have the 4,000lb lactation the other dairy farmers are looking for.

BUT, the 97%ile tells you she WILL have one - and 4% b.f.! And B E is the bomb. And then her kid will cost \$1,000 more.

Best Udder in Show versus 24 milkers!
Now here is a doe that did 15.0 on February 28, 2015 when she was born in 2006. WIARA’s last buck went to Canada for 1,995.

She now has 27,000 lb. Lifetime
BING’s dam freshened at 8 or 9 months. So did WIARA. That’s why we bred them! Every doe that is not milking is costing you money. Your herd should stop standing around dry and start getting the milk check up. WIARA is the oldest doe in the herd and still bringing home the bacon as of May 2014. 14.5 lb/day!!
WIARA gave us the beautiful, big producing ANDROMEDA who sold for \$2,895. BING was the friendliest, smartest buck but he is a little small for his age so far. Judge Katie Wolf rated these two #4 and #5 in looks out of 37 buck kids in May 2014. NEW ERA and his brother competed versus 4 other buck kids on June 8 and the consensus of 3 judges is that NEW ERA is the best looking of this year’s CAPRIKORN buck kids, and his brother ERA second.

D: CAPRIKORN STARBY DONUT 3*M lost one side

DD: SGCH CAPRIKORN WEALTH XTORT 2*M - page 16 **Over 30,000 lifetime**

Style, but loose shoulders, friendly. In April 2016 we said “Very nice looking mammary maybe EX” And in fact the Appraiser did go with “E” in September. Only 6 pounds on her first test as a yearling though. Need more tests. WE WILL TAKE ALL THE DONUT DAUGHTERS WE CAN GET. In September 2016 the beautiful mammary was a perfect size - for a mature doe. What that means is this awesome doe's kids **will be a good deal for dairymen**. Because the mammary will grow too big for the American Show Goat Assn scorecard by the time she is two. So she will never have the really high placing that drives the prices up. She has had a case of mastitis all lactation long that we tried to treat simply by remilking her. But that didn't work so far. HER YEARLING NUMBERS WOULD BE EVEN BIGGER WITHOUT THE MASTITIS. FUSILLI was only shown once. On August 4, 2017 the judge made her Reserve Best Udder over AIRACOBRA, EXTRA ALOHA, FABULOUS and 10 other show does. code smh 85 ks 90 BB,

One Time Reserve Grand Champion - probably not a good judgment

To get the biggest milk check, try using a buck whose dam is 99th Rank. But that is half the story, even better is if his sire is also ranked 99. YELSON is not ranked yet, but his dam was 99.

After disbudding, BULGING EYE’s right eye was swollen and it protruded. Also he was a little lethargic. Maybe he is blind in that eye. He is very friendly. This is a very handsome buck. We used him on Cleanup on about 15 does we tried to breed in August. It always worried Scott that he is not hyper like his Dad. But the computer has him at plus 302 for milk in March 2017. The highest rating on the Elite Buck List is plus 244.

BULGING EYE was our main choice in Fall of 2016.

BULGING EYE may be too dairy. He needs to be hooked up with your normal dairy doe, who is not dairy enough, or even better, a fatso. (His dam was “skin”, bones, and mammary.) But its hard to find a “fatso” here.

A lot of the top milk bucks were quite lean, bordering on frail. VOICE OF REASON was a string bean. Strange.

We bred him to 15 in Fall of 2014 and 25 in Fall 2015.

We took BULGING EYE to his first show on Jun 8, 2014. He was first of three in Ring One, Second in Ring 2, First in Ring 3, and Third in Ring 4. In Ring One, he was Grand Champion versus 12.

In the 2016 3 Ring Buck Show he was Reserve to the Grand in all 3 rings.

SD: KENT STATE - Top Ten Protein

D: SG CAPRIKORN KRUG’S **STARGATE** – page 59 – #1 in U.S.A TWO DIFFERENT YEARS! (All Breeds)LA-90 & LA-89 & BUIS vs. 24 milkers.

Not only did WIARA start early, 9 months of age, but very few does can do 2,900 ending at 8 ½ years old.

Her dau ANDROMEDA was 10th? yrlnng milker at National Show

Every day a doe is dry we lose money.

WIARA was 97 Percentile rank. Her doe Yiara owned by Scarlett Payne.

Our other Top Ten that year was WIARA’s niece YIN YANG #821.

WIARA bred herself and kidded at 9 months of age! AND had a 16 lb test! Her dau #6112, was the third doe to kid in 2017, even though she herself was a March baby. WIARA is super friendly. So is her son, #6111.

WIARA had a PTA for stature of plus 9.9, which is bigger than any buck in adgagenetics. At 1 yr & 6 months, bigger than the mature does. (MOOSE was a giant). What if we could develop a strain that always kidded at well under one year and also milked great? So in Fall 2013 we were using BING, because he was born when his dam was 8 ½ months old. But he was bought. The result of that breeding is #4124, NEW ERA. But so far we can’t say that he NEW ERA dau’s are kidding early.

Our oldest doe as of February 2016 and TESTED PREGNANT! We used her son, NEW ERA, #424.

And we used her son #6111. Him very friendly with personality. WIARA big head with a lot of love.

Where she really helps us is with a very wide rump. We want that so we can have giant escutcheons.

Her Dau HARA is way above the other milking yearlings in May 2017.

If you saw CHEYENNE you would know right away you want her kids.

We said: "Her dam was ranked 99th percentile and her sire is our best milk buck out of those with a positive PTAFS. It is scary how good CHEYENNE could be. As a kid she has been shown only once and was Grand Champion in milk. Before she turned two she was first in both rings as a milking yearling. Then we stopped showing her. We know the body is there and we know the milk is there and we know the components are there. If she gets the awesome mammary she becomes a \$5,000 doe and her babies sell for 1,500. If not, she is a 1,500 doe and babies sell for 600. It's too bad that U.S. Breeders put way too much weight on mammaries and way too little weight on milk/fat/protein. But that IS the way it IS."

2/19/14 Scott said "an E mammary – maybe not enough fore. Fabulous rear and teats."

Shown only once in 2015 and of course she could not beat CASSIOPEIA. CHEYENNE got coded "A" for acceptable for feet. Rear feet weakness is the very reason the Ryals turned down WINNEMUCCA as a kid. Since we breed for strong rear pasterns, we knocked CHEYENNE'S PRICE DOWN BY 400 AND HER KIDS DOWN BY 300.

Second place at Nat'ls July 4, 2016 with her dau FLORENCE 3 PAGES FORWARD.

August 8, 2016 - BEST IN SHOW versus 54 milkers. (2nd leg) Price went up 1,900.

In the ribbons 2017 National Show

smh code 90 ks

JACKSON's sire CZARGATE makes weird ears. They are folded. When the kid grows up they unfold and become normal. So maybe JACKSON will do that.

Are you:

A. A dairy Farmer Customer-
You don't care about EARS

OR

B. A saanen Breeder-
You should care!
Registration issue??

Of course JACKSON's kids will be only 1/4 CZARCATE so the issue should disappear.

Ended with Lifetime 1,396 days 15,575 pounds 2.8 b.f. 2.8 pro
Finished in only 4 shows, a total of 6 rings.

An ELITE DOE (which strictly measures milk/fat/protein genes). VIOLET had "INVERSION" - more protein than fat. We chose VIOLET's twin VERN to breed the awesome does STARGATE P.33 and VENICE P.28a. Nine pounds at birth. We named the dam to honor Tina Gilchrist's immortal GCH FOOTHILL FARM MEADOW SPRING TOP TEN LA 90. Dam had the big arc 35. And Rear Udder height: 38. Dam had extra teat. VIOLET started life with the RENOV steep rump. That changed. We don't want to waste time on conformation but one item we do want is "The Big Arc"! We used to have big wide escutcheons. When CRUZERIO did 5100, totally smashing our previous record, everything became lined on her. Then we lost the Big Arc. SPRING's descendants will bring it back. As of November 2012, Violets lifetime was 1,396 days 15,575 milk. She had cream, not white hair and an undesirable Saanen nose. It's so easy to be the top Saanen milk herd. The other breeders select for color and noses. We can just keep selecting for milk/fat/protein, all wrapped into one number called "percentile," or "Rank". VIOLET "HAD IT ALL"

It is very unusual for their to be two straight generations of 92's. There are very few Saanen 92's in any given year.

That said the SGCH's and the Top Tens make HAWK a Spotlight Sale buck. But the sale is in Texas, not dairy country, this year. HAWK is longer than the other buck kids like his dam and her brother, MEADOW BOSS, one of our main herd sires.

This one hurt! MEADOW HAWK had a full brother, MEADOW HAWK 2. He got what we call "the Bulldog" - front shoulders loose, front legs crooked-bowing out, winging out. SALE BARN. A \$5,000 hurt.

HAWK - "One of American Dairy Goat Associations Sire Development Bucks"

To get the biggest milk check, try using a buck whose dam is 99th Rank. But that is half the story, even better is if his sire is also ranked 99. YELSON is not ranked yet, but his dam was 99.

After disbudding, BULGING EYE's right eye was swollen and it protruded. Also he was a little lethargic. Maybe he is blind in that eye. He is very friendly. This is a very handsome buck. We used him on Cleanup on about 15 does we tried to breed in August. It always worried Scott that he is not hyper like his Dad. But the computer has him at plus 302 for milk in March 2017. The highest rating on the Elite Buck List is plus 244.

BULGING EYE may be too dairy. He needs to be hooked up with your normal dairy doe, who is not dairy enough, or even better, a fatso. (His dam was "skin", bones, and mammary.) But its hard to find a "fatso" here.

A lot of the top milk bucks were quite lean, bordering on frail. VOICE OF REASON was a string bean. Strange.

We bred him to 15 in Fall of 2014 and 25 in Fall 2015.

We took BULGING EYE to his first show on Jun 8, 2014. He was first of three in Ring One, Second in Ring 2, First in Ring 3, and Third in Ring 4. In Ring One, he was Grand Champion versus 12.

In the 2016 3 Ring Buck Show he was Reserve to the Grand in all 3 rings.

DD: RESTITUTION 3*M LA-90 above!

DDD: JUSTICE! Page 35

When Ron came by to pick up the doe Ann Estep had bought, that doe was sick. We don't sell sick or injured goats. So we substituted CINCERITY, CENCERITY'S full sister, even though she was priced \$395 higher. A LOT OF THINGS HAPPEN WHEN YOU BUY A SAANEN. IT HELPS TO KNOW WHO YOU ARE DEALING WITH FROM THE START OF YOUR SHOPPING EXPERIENCE.

CENCERITY'S mammary was disappointingly small as a baby. But her dam did the same thing and came back and went perm and Top Five. And her dam ended with a mammary too BIG.

CENCERITY's teats are right, angling very slightly in. This is what we want to key on because most Saanens teats are aiming slightly out. BUYER'S TIP: Angling out is not good. Maybe your doe won't get mastitis. But maybe she will. You have ENOUGH problems as a Dairy Farmer without another mastitis case. PRE-DIP + POST-DIP. However the teats are too narrow. But they are long enough for our handmilking customers.

As a 2.y.o. she was looking very good. ADGA failed to appraise us. They were short of Appraisers. We'll see at 3.

#258 is looking good. Mammary is either VG or EX

WE ARE USING HER SON, HONESTY. If you are a dairy farmer, that's all you need to know to reserve her next son for YOUR herd.

WINNER OF LIFETIME MILK AWARD over all Saanens July 2013 & again July
'14 AND 3.5% lifetime fat

3.06 305 3894 131 3.4% 109 2.8%

lifetime 2,072 days 22,781 lb milk 3.4% fat

FLASH was the highest milking yearling on the yearlings first test.
And the highest projection after the second test.

Dam is a show star, but not the very top of our milk. The Sire, however, should kick the milk up
through the roof. So HOT ROCKS is worth the investment if you want a lot of help with your udders
and feet in ADDITION to big milk checks. But if you only need milk/fat/protein, skip on to a
cheaper guy.

We said "FLASH is going in the ring at the Nationals July 4th and if she smokes them, HOT ROCKS
price will go up." She didn't kill them but she did really well. So we took the price from \$1,995 to
\$2,795.

UPDATE -On August 7th the cdcB ratings came out and FLASH got a 96th %ile and CZARGATE
got a rating high enough to make him #1. After mastitis the ctr knocked her down to 89 from 96.
Except he only has daughters in one herd. So we took HOT ROCKS from
\$2,795 to \$5,995 because he suddenly is the buck of the year and we want to use him in our breeding
program.

On September 23, 2016 failed to collect semen while A/I guy was here.

Scott is giving him Ec. The appraiser gave him a +EcV+. Scott says excellent topline,
Excellent width front and back. Looks great on the move. Excellent head and rear leg angulation.

Not friendly enough Vg+ especially. Shoulders are good not great. VG and BC clean front legs. Back heels are a little shallow.

09-09 220 1950 53 2.7% 54 2.8% IN PROGRESS
Still milking at 10 years old SEPTEMBER 2016!!
Lifetime 2,497 days 27,299 lb and climbing. WOW!

Not only did she start early, 9 months of age, but very few does can do 2,900 ending at 8 ½ years old. Her dau ANDROMEDA was 10th? yr lmg milker at National Show
What if we could develop a strain that always kidded at under one year?
WIARA, FORMERLY 97 Percentile rank, has fallen to 90th.
The USDA computer needs to learn how to give older does a break. Her doe Yiara owned by Scarlett Payne.

Our other Top Ten that year was WIARA's niece YIN YANG #821.
WIARA bred herself and kidded at 9 months of age! AND had a 16 lb test! WIARA is super friendly. WIARA had a PTA for stature of plus 9.9, which was bigger than any buck in adgagenetics. At 1 yr & 6 months, bigger than the mature does. (MOOSE was a giant). So in Fall 2013 we were using BING, because he was born when his dam was 8 ½ months old. BING was bought, but he begat NEW ERA #424, before he left. So now we have the start of a new breed of Saanens that kid at a younger age so the dairy farmer doesnt keep losing money on them while they are dry.

Our oldest doe as of February 2016 and TESTED PREGNANT! We use her son, NEW ERA, #424. And HERACLES will probably be our clen up buck this winter.
DD: SG CAPRIKORN KRUG'S STARGATE - page 59 - #1 in U.S.A TWO DIFFRENT YEARS! (All breeds)

LA-90 & LA-89 & BUIS vs. 24 milkers.

Now the question is - Since we use a WIARA son here, why hasn't anyone bought HERACLES? Because they think they know better than the heaviest milking herd in the U.S.? Or because they don't realize that if their herd was averaging 11.7 like WIARA's, their milk checks would go up by \$51,030 per year.

11.7 pounds here minus 9 pounds there equals 2.7 lb per day times 150 does times 300 days times \$42/ hundredweight equals \$51,030 more per year.

HERACLES does have a weakness - his dam's b.f.%. ECLIPSE should bring that up, but not enough for it to be positive.

HERACLES has one rear foot that Scott calls a "rocker foot."

#424 - WIARA's babies are friendly, have personality, and come up to you when you go into their pen.

HERACLES Big and Rangy, Excellent length. Shallow heels, good rear leg angulation. Clean front legs. Good to very good escutcheon.
Good shoulders, Excellent DC. Probably go 91 at 5 years old.
Extraordinarily friendly, inquisitive, and human like. We used him as the clean up buck on the main milking herd.

He got 3 "Ec"s - front legs, rear legs, and back

He got 1 "A" - shoulder assembly. The rest of the scores were usual.
"As for who to breed them to? You say whomever you wish. But not ZEPPO ever again! His kids are too big."(From a customer who leases our bucks).

ZEPPO has 46 registered dau's as of January 2016. His dau's are BIGGER, AND THAT IS IMPORTANT TO US. Because a 16 lb milker that is small is more likely to give a dairy farmer health problems. But a 16 Lb. Milker that is BIG can handle it.

ZEPPO is Mr. Protein. He has the second highest protein % of any of our bucks, ever. To breed for higher fat and protein you have to sacrifice a little milk. We already have half a dozen does that come in at 3,9xx lb.

You might pass over these does in favor of a buck kid from a doe that comes in at 4,xxx. BUT BE AWARE THE HIGHER FAT/PROTEIN DOE BRINGS IN A BIGGER MILK CHECK.

The winners of the Four Milk and Fat Awards at the 2016 Nationals were both ZEPPPO dau's.

A dairy farmer could buy HAZELNUT and someday use her son as his Junior Herdsire, if he breeds her to a really good buck.

DD: SGCH CAPRIKORN WEALTH XTORT 2*M

XTORT's mammary milks way down. This means she should get an "e" for udder texture. But the Appraiser wouldn't give her one. The Linear Appraisal program is great but it DOES HAVE a box for udder texture and it DOES NOT have a box for TOPLINE or SHARP WITHERS.

XTORT is not a big doe, making her milk records even more remarkable.

XTORT'S DAU CUMIN IS BEATING THE ENTIRE HERD as of August 2014, even though she is only 2 y o. She made Top Ten. And CUMIN again beat the whole herd in 2015. And so far in Dec of 2016. Looks like she will make 5,000 in 305.

smh code H 91

The pedigree is so deep that HAZELNUT has to MILK GREAT. If you feel that is a brash statement, put your money down in a wager and we will give you great odds.

But JUSTANUT was born so late that no one will buy him for the 2017 Fall breeding season. So maybe we use him here in Fall 2018.

YOU JUST HAVE TO HAVE A MATURE BUCK?

Best way to get one is buy a buck kid and wait a year.

COBALT already has milking dau's at CAPRIKORN. He is a fundamental part of our breeding program. His sister went for 2,600 and his brother went for 2,395 So Alice jacked up the price because she would like to have a ROCKET son for a change. All the others were bought This was an awesome looking baby buck. He had that sweeping look judge's love, starting from high sharp withers, traveling back along straight topline to a very good rump angle, being lower in the rump than the withers. Then he became a yearling. Our yearling bucks are ugly. One place Scott can fault him is the rump could be wider. Secondly, ZURICH has a slight minus for PTAFS.

Cobalt is plus for type.

His PTAM, PTAF and PTAP% would make him about the equivalent of 95%ile. But although he has 24 registered dau's none have ever been on a test in a DIFFERENT herd than CAPRIKORN. So he does not print on the Top Buck (cdcd.us) or Elite Buck lists. IT IS RARE FOR A 95th %ILE BUCK TO ALSO BE POSITIVE FOR TYPE.

You get the best one! Which right now is CZARBUCK Because CZARGATE has a broken back leg. We sell semen from him. TWO OF CZARBUCKS KIDS WERE NARROW AND WEAK WHENVIEWED FROM THE FRONT. We haven't seen enough of them to know if this is a trend or just a fluke. Same dam. CZARGATE is making what we call "folded ears". Where this comes from we have no idea. His babies have it but almost all of them straighten out when they get older. Of course, dairy farmers don't care because CZARGATE GETS THE MILK CHECK UP! But if you are a devotee of "true Saanen breed type" you would avoid CZARGATE.

DD: SG CAPRIKORN RV YGERNE 12*M TOP TEN LA-92 9th place at Nationals.

YEARLING LA-86 +EEV Jermain

LA-91! 3yo Jermain

LA-92! EEEE 4yo White

03-11 269 4427 129 2.9% 120 2.7% should be Top Ten

She was on pace for 5,000 in 305 June 2012.

YGERNE was cruising at 19lb per day in may 2011 and going up. Had (more protein than fat) but it changed.

HAD A SHOT AT 5,000 THIS LACTATION!! The trip to colorado and back slowed her down. 10th Place 4 y.o. at 2012 Nationals!! (out of 19) Ben Rupchis, an extremely picky breeder, is starting a new super herd. He chose YGERNE's son DEBLIN as his herd sire.

DOBRE pronounced DOUGH-brayis clearly the milkiest yearling out of about 30. AND originally we rated her about the 3rd to 5th showiest, miracle of miracles! Then Judge Wolf picked her out over all our yearlings to make the trip to Nationals. THEN she defeated ZTARTREK, AIRACOBRA, and CASSIOPIEA on sept. 13, 2014!! (Normally YEARLINGS DO NOT DEFEAT OLDER MILKERS!) So after we prove out BLUE and BULGING EYE and BOSS and HOT ROCKS, ELYAN will be our next herd sire. Unless someone buys him. ELYAN's first couple kids look great, but it's too soon to tell A Lot will depend on how CZARBUCK proves out.

09-09 220 1950 53 2.7% 54 2.8% IN PROGRESS
Still milking at 10 years old SEPTEMBER 2016!!
Lifetime 2,497 days 27,299 lb and climbing. WOW!

Not only did she start early, 9 months of age, but very few does can do 2,900 ending at 8 ½ years old. Her dau ANDROMEDA was 10th? yr lmg milker at National Show
What if we could develop a strain that always kidded at under one year?
WIARA, FORMERLY 97 Percentile rank, has fallen to 90th.
The USDA computer needs to learn how to give older does a break. Her doe Yiara owned by Scarlett Payne.

Our other Top Ten that year was WIARA's niece YIN YANG #821.
WIARA bred herself and kidded at 9 months of age! AND had a 16 lb test! WIARA is super friendly. WIARA had a PTA for stature of plus 9.9, which was bigger than any buck in adgagenetics. At 1 yr & 6 months, bigger than the mature does. (MOOSE was a giant). So in Fall 2013 we were using BING, because he was born when his dam was 8 ½ months old. BING was bought, but he begat NEW ERA #424, before he left. So now we have the start of a new breed of Saanens that kid at a younger age so the dairy farmer doesnt keep losing money on them while they are dry.

Our oldest doe as of February 2016 and TESTED PREGNANT! We use her son, NEW ERA, #424. And HERACLES will probably be our clen up buck this winter.
DD: SG CAPRIKORN KRUG'S STARGATE - page 59 - #1 in U.S.A TWO DIFFRENT YEARS! (All breeds)

LA-90 & LA-89 & BUIS vs. 24 milkers.

Now the question is - Since we use a WIARA son here, why hasn't anyone bought HERACLES? Because they think they know better than the heaviest milking herd in the U.S.? Or because they don't realize that if their herd was averaging 11.7 like WIARA's, their milk checks would go up by \$51,030 per year.

11.7 pounds here minus 9 pounds there equals 2.7 lb per day times 150 does times 300 days times \$42/ hundredweight equals \$51,030 more per year.

HERACLES does have a weakness - his dam's b.f.%. ECLIPSE should bring that up, but not enough for it to be positive.

HERACLES has one rear foot that Scott calls a "rocker foot."

HERACLES – "One of American Dairy Goat Associations Sire Development Bucks"

#424 - WIARA's babies are friendly, have personality, and come up to you when you go into their pen.

HERACLES Big and Rangy, Excellent length. Shallow heels, good rear leg angulation. Clean front legs. Good to very good escutcheon.

Good shoulders, Excellent DC. Probably go 91 at 5 years old.

Extraordinarily friendly, inquisitive, and human like. We used him as the clean up buck on the main milking herd.

This is an awesome choice for a herd that is commercial and has some mixture of Alpines and Saanens because Scott used this buck heavily as the clean-up buck at Caprikorn Farms. So you know that he's got the milk. Starting in 2017 we became dismayed with the back pasterns. Other herds will take a beautiful udder and a poor set of back pasterns. At Caprikorn we would rather have strong back pasterns and a not so pretty udder. If you have a mixed herd, then you probably have good back pasterns. We are Saanen breeders and we have always bred for strong back pasterns because all 120 Saaneds that were brought into the U.S. had poor back pasterns.
