2024 Bucks for Sale

April 24, 2024

In NEW CF/2024: 2024_Bucks_for_Sale

*We believe all of these buck kids will have a negative CL test as soon as we can draw blood
and ship it.
(meaning they are clean)*

If you want one, send a deposit of 10% (or a \$100 minimum) and a contract2

*Contract2 is behind the button, "Order Forms," on the website.

Or call us (301) 834-8030 and we will fill it out!

THANKS!!

TABLE OF CONTENTS

Here is a list of the 2024 bucks, listed in birthday order.

Warning: CAPRIKORN yearling bucks are usually ugly.

Pretty as babies. Very handsome as older bucks.

<u>NAME</u>	<u>TAG #</u>	<u>BORN</u>	<u>PRICE</u>

“Reserved by _____” means **NOT AVAILABLE**.

Someone else has already put their money down.

If you’d like to be *that someone* next year when someone else looks at these lists, YOU can reserve a baby in advance by going to “Advance Baby Sales.”

Thank you for looking!

We use the term “**Percentile**” or “Rank” or “%ile” frequently – *What does that mean?*

All of the does on test in the U.S. are linked by the USDA computers.

If the doe has big numbers but all the other does in her “management group” ALSO have big numbers, the doe is not highly rated by the USDA.

If the doe has weak numbers but every one of her relatives has strong numbers *compared to their management groups*, the doe **IS** highly rated.

PERCENTILE is the only number you can count on for YOUR HERD.

a NUMBER LIKE 4500 POUNDS is about 55% determined by how good the management was when the doe made the record, 25% determined by how good the owner was at cheating on test, and 20% how much milk/fat/protein the doe actually has.

Those first two numbers add up to 80%.

Many many dairy people have said: “Production is 80% management and 20% genetics.”

A dairy farmer wrote in with the question:

“Is it really worth paying more for the more expensive buck?”

Scott wrote back, in Spring 2016:

“The answer is I don’t know.

Here is one dollar and cents approach I thought of.

There are 16 **99th** %ile does. The average PTAM of those 16 is 333.

There are 16 **95th** %ile does. The average PTAM of those 16 is 230.

So it looks like for every one percentile drop the milk goes down by 26 pounds. HENOOSKI had a dam with a PTAM of a 93 so that would be 6 percentiles down from HAN SHOT FIRST.

26 pounds times 6 percentiles = 156 lb /year. So that would mean on average his daughters will give you 156 less pounds every year, year after year. And his granddaughters will give you one - half of 156 pounds year after year. So if you are milking 80, then $80 \times 26 \times 7 \times .41/\text{pound} = \$5,970$

80 does x 156 pounds = 12,480 pounds per year.

12,480 pounds per year @ \$40cwt = \$4,992.

5 years of milk from each doe equals \$24,960.

That’s my guess.”

A lot of work needs to be done to make this computation more accurate.

First, what about the granddaughters and great granddaughters?

Nothing was added to the \$24,960 for them.

Second, probably starting by comparing the 99th percentile to the 95th percentile is not right. Because the 99th percentile will have a few that are REALLY crazy for milk.

So, if we found 16 does in 85th percentile and averaged their milk (PTAM). Then subtracted that number from 230, which is the average for the 16 in the 95th percentile. That would give us the drop for 10 percentiles. Dividing that by 10 would probably give us a more accurate figure than 26 pounds per percentile.

TESTIMONIALS

“The Caprikorn does are amazing. They so out class the rest of the herd it’s not funny.”

-Trent Hendricks, MO

“A big congratulations to your TOP TEN DOES last year. I keep reading on and on and kept seeing all your listed. Yea Caprikorn!”

-Tom & Roni, CA

“We have 144 CAPRIKORN HOT SAUCE daughters. The YEARLINGS from him tower over a lot of the older does.”

Keith from New England

“We LOVE our Caprikorn Farm goats – they are not only very productive, they are lovely personalities – smart, but not overly pushy.”

-Bedford Blueberry Goat Farm, MA

“I would say you are probably the top herd in the nation now with those classification scores and that milk production.”

-Janelle Anderson, 30-year Saanen Breeder, NE

“Our KID ROCK daughters are milking 10 pounds at 10 months of age!”

-Emanuel Schneider, PA

“By the way, HOT ROD is doing great. His girls have had their first kids. He definitely improved our genetic pool.”

-Andrea Gauvreau, Quebec

“Scott, bought seven does from OK. Had never seen such milk or quality in a goat herd. When asked about the genetics he said they were Caprikorn.”

“They are doing 18 pounds a day. The yearlings are doing 13 pounds a day.”

-Thomas Childress, Hereford Breeder, TX

“I am overly pleased with EARTHMAN and the improvements that I can already see that he has made to our farm.”

-Wendy, Bootleg Farm, GA

“My name is Shereen and I bought a buck from you a couple years ago. Fantastic buck - I love this buck!”

- Shereen Wilcox, PA

“We have 105 does..Just so you know the Caprikorns are the nicest and largest ones. We can always pick them out just by looking at them.”

-Lori Lyons, WI

“Dear Scott, that is some Sales List! I know your goats are the BEST!”

-Brad Parker, Pipe Dreams Fromage, PA

“Hey Scott, I got to milk some of your best goats when Alice was here; was impressed!”

-Levi Petersheim, IA

“The Caprikorn girls are doing FANTASTIC! They are exceeding our expectations. They are always coming in with full bags and they don’t want to slow down production very quickly when it is time to start drying up.”

-Jared Rebling, Brighton, IA

“AMBER is a milk machine. I appreciate the temperament of all your goats; they are so nice and loving!”

-Scarlett Payne, Utica, OH

“A lot of the ones we have from your bucks freshened at 11 months and they’re just fantastic.”

-Keith Tift, VT

“DILL and DYLEX are **amazing**, and as milking yearlings were amazing also...”

-Lila Streff, SD

“I appreciate that you are willing to refund our deposits; we have decided to back out of all 11 dairy goat kids.”

- Trisha Bickel, Hamburg, PA

“I have appraised all the major Saanen herds and you have the best feet and legs.”

-Linear Appraiser, American Dairy Goat Assn., 2013

“I am so very glad to be able to work with you as you are one of the most reliable and honest goat breeders I know. It is such a pleasure to have complete confidence in a purchase to know that it will be totally as represented.”

-Teddy West, OH

The 95th percentile does average **243** per PTAM.

The 98th percentile does average **302** per PTAM.

Increase of 59 pounds per year.

There are 3 percentage points between 95 & 98.

Therefore each percentile translates into **20** pounds of milk per doe per year.

So, for example, if you have a normal non-tested herd, that MIGHT be 40th percentile.

If you use 90th percentile bucks, you move up by 1,000 pounds per doe per year.
(20 pounds times 50 percentiles)

If you are getting \$53 cwt, your income goes up by \$39,000 for every 100 does you milk.

5-00 305 5,093 190 3.7% 150 3.0%

DDD: CAPRIKORN CZARGATE FROMAGE #537 98th percentile

#1 doe in the 98th%ile on the USDA-DHIA genetic evaluation as of March 2021.

Two different daughters of FROMAGE have given 5,000 lb in 305 days

The USDA formula which the CDCB computer uses to develop percentiles is fabulous. Yet it is not perfect. The weighing of butterfat is too high and the weighing of protein is too low.

PROVOLONE would be 99th percentile (high as they go) if the USDA had correctly weighted protein in their out of date formula.

Highest lifetime production of any USA Saanen

D: CAPRIKORN KLINGON NOVELLA 5*M #164 BORN JAN 30, 2021

DDS:ECLIPSE former #1 buck in the US.

DD: SG CAPRIKORN ECLIPSE HELIO DOE 4*M #6165

02-11 305 **4075** 163 **4.0%** 122 3.0%.

DDD: SG CAPRIKORN ZEPPPO CZTAR 3*M #248— LA-90 **99TH** %ile top ten
second highest rated Saanen in US on August 2019 Elite Doe List

00-11 305 2696 109 4.0% 82 3.0% COMPONENTS. Awesome baby lactation.

01-11 253 2923 87 3.0% 86 2.9% in progress - thought she would finish at 3200, but actually 01-11 305 3315 104 3.1% 100 3.0% this doe *milks strong in late lactation*.

Winter milk is more valuable than summer milk and USDA's excellent formula does not measure that.

01-11 319 3411 108 3.2% 104 3.0%

02-11 302 **4123** 157 3.8% 123 3.0%

02-11 365 **5154** 197 149 04-01 305 4500 171 3.8% 123 3.0%

04-01 659 **8661** 337 255

NOVELLA is rated at 96 % ile by USDA. She does not have a big lactation yet because she is still only one year old as of January 2024.

That is more milk/fat/protein than 24 out of 25 TESTED Saanens.

Seems like NUKE will take SHORT STORY higher.

How high would she go if she had not been bagged tight for 6 shows in 2023? We breed for milk, not show.

28.8 is the most milk anyone has ever made at CAPRIKORN in 40-some years of continuous DHI.

Scott's early take on NAUGHTY's buck kids at one day old:

#436 has clear advantage due to a better rear end assembly composed of a slightly more level rump and a little more escutcheon.

#437 is a close second, just not as level across the entire top line.

#438 is actually out-eating the other two, but has some early cream color. He is probably the Dairy Farmer's choice!

MARCH 15 UPDATE TO SUPER SPICE, SUPER R, and SPR RR SPICE

With only 24 dry days following her 5,258 pound 2 y o lactation, NAUGHTY gave 22.0 on her first test and 26.1 on her second test!!!

Lifetime 32,000 tops of all U.S. Saanens

NAUGHTY is actually better than her USDA rating. She wears 1127.

Stary wears 1123.

NAUGHTY was cruising at 16, 17, 18, 19.

STARY was doing 12. The tester got them switched.

NAUGHTY's first 3 tests THIS year are 22.0, 26.1, 28.8.

She is running way ahead of her 1yr and 0 month lactation, which was last year.

28.8 is the most milk anyone has ever made at CAPRIKORN in 40-some years of continuous DHI.

DD : CAPRIKORN HERC KASHTA 4*M #827 99%ile

03-01 305 days 5,068 lb 3.5% fat 2.9% protein

DDD : CAPRIKORN CZARGATE FROMAGE 3*M #537

THE USDA DHIA COMPUTER PROGRAM MAKES FROMAGE 99TH %ile!!

Because she has great lactations? NO! Because the computer knows the lactations of all her relatives and they are beating their herdmates. FROMAGE 99TH percentile GENETICALLY!

01-00 305 2476 83 3.4% 77 3.1%

02-00 286 2314 89 3.8% 76 3.3%

03-00 305 3227 117 3.6% 102 3.2%

No use looking at her lactations, one side of mammary ruined. Most dairy **goat** farmers don't understand "GENES."

So they don't buy her kids.

So we have a lot of her kids left **here**.

And they are doing great for us.

Two of them have exceeded 5,000 lb in 305 days or less!

Does any other Saanen dam in the U.S. have TWO daus that gave 5,000 lb of milk in 305 days?

Looking for protein? Look no further.

That is why we have used and are using DE LE FROMAGE's other son CAPRIKORN SPICE RENNET.

For years we said:

"All Saanens test no higher than 3.2% protein."

"All Saanens test between 2.7and 3.2 protein."

However, 18 different samples were drawn by our cow tester and sent to the lab in the year that DE LE FROMAGE tested 3.3%.

A big doe. Maybe the best looking of the "Class of 2011". E Mammary.

DDD : CAPRIKORN ZEPPO LT AYALA 02-07

304 **4476** 120 2.7% 125 2.8% **TopTen**

This is weird! On her first test of 2022, EKORIA led the herd with 23.2 lbs. Why is that weird? She has beaten the whole herd on her first test the year before. It's weird because SHE WAS EIGHT YEARS OLD!
